

Groundbreaking air cleaning solutions -BioTrails- for Paris London & Rotterdam by Dutch Start-up

AMSTERDAM , NORTH NETHERLANDS, NEDERLANDS, April 15, 2015 /EINPresswire.com/ -- Biotrails.com invented The BioAIRTrails XXXL. These are big airtrail factories with the measurements of 3 meters and a diameter of 3 meters, BioTrail factories atomize long healthy air in the atmosphere for 24 hours a day, 7 days a week. The super large humidifier has a tank of 10,000 liters of water that

is mixed with filtering minerals. The BioAIRTRAILS XXXL are specially developed for cities as Rotterdam, London and Paris to clean the atmosphere. The founders behind Biotrails.com are the same as the founders that designed change-agency.nl a international social media platform for world improvers and positive people.

“

Biotrails most promising startup with Air pollution solution for big cities! Support Biotrails.com and make the world healthy again!

Air pollution is the introduction of particulates, biological molecules, or other harmful materials into the Earth's atmosphere, causing disease, death to humans, damage to other living organisms such as food crops, or the natural or

built environment. As you probably already know, the atmosphere is a complex natural gaseous system that is essential to support life on planet Earth. This means that it is essential to our survival to take good care of our Earth and our atmosphere. In our current society however, there are many harmful substances affecting our atmosphere. Examples of air polluting chemicals are exhaust fumes, chemical waste and even Chemtrails.

A BioTrail is the opposite of a chemtrail. It is a spray capsule with a mixture of Alkaline water, zeolite, magnetite and Colloidal Gold, which is distributed by means of a diffuser in the air. Thus ensuring a healthier atmosphere, healthier air and therefore a healthier earth. Our air, seawater and groundwater are, just like our drinking water, too acidic with all its consequences. Do we have a solution? Now we do! Lets really do something about the Pollution problems and support BIOTRAILS XXXL on KICKSTARTER.

The BioAIRTrail Formule

The BioTrail tank consists alkaline water, this makes for a less acidic air and soil because of the high pH value that the capsules contain. 0.3lbs. zeolite powder added per 4 liter water on and mixed with the alkaline water. Zeolite removes all harmful substances from the air and out of the ground. 500 ml colloidal gold per 4 liter is added to the mixture.

The first BioAIRTRAIL XXXL is currently being developed in collaboration with a Chinese partner company and should be ready for use in September 2015. Biotrails.com will enter into discussion with the municipality of Rotterdam and Paris to place the first BIOTRAIL XXXL in one of these cities.

The BioTRAILS XXXL turn the air and soil back to its natural state Because of the exhaust gases, chemicals and chemtrails that are spread through our atmosphere, our atmosphere is becoming too acid. How acid or base (the opposite of acid) something is, is indicated by the acidity, also referred to

as pH-value. Substances with a pH-value of 1 to 7 are acidic and substances with a pH-value of 7 to 14 are basic (also called alkaline). Blood, for example, should have a pH-value between 7.35 and 7.45. The acidity of the blood depends on the amount of acidic or basic substances that are dissolved. If your blood is too acidic, your body will try to balance this out. The Bioairtrails XXXI cleans the atmosphere and our ground water and even people get a better health from it.

SUPPORT US NOW on Kickstarter! <https://www.kickstarter.com/projects/551030052/biotrails-xxxl>

And get your Health gadgets now! Rewards as Energy alkaline Cup, A Biotrail XL for home use, a alkaline drink water Stick and more. Also available on www.Biotrails.com
