View on App Store:

<http://apple.co/1FPXumX>

Cambodian New Year Offer \$1.99 (14-21 April)

The app is apt for the mobile era- an instant solution for a specific purpose, rather than loads of information. It is about trips - mood trips- authentic and magical experiences with minimal effort.

APP REVIEWERS:

Please contact TerraXYZ for a promotional code (based on availability).

SIGN UP FOR PARTNERSHIPS

TerraXYZ invites travel photographers (to extend the reach to other destinations), iOS Developers (with journaling or location apps), & travel agents (providing content rich itineraries to guests outbound to SEAsia) for partnerships .

ABOUT THE APP:

Mood Trips Angkor! is about trips around the Angkor Archeological Park in Siem Reap, Cambodia. The trips are comprehensive and fit a set of 'mood themes' which define Angkor. Mood trips enable travelers on a short vacation an easy way to absorb various experiences, with an overall 'feel' of a place or concept.

UI: Minimalistic, Granular Design

The app is inspired by iOS 7 itself, with clean layouts. The 500+ high resolution photos linked to the mapcast, are animated in various sizes as needed. The 700Mb app plays smoothly without need for image download.

The screen flow from trip themes to GPS maps, is based on a granular approach. Casual graphic maps with visuals and tips are easy to grasp. Only when the final GPS map is generated, the app displays exact photo pins and time stamps, with a detailed overlay map at each spot for points to sit, walk or for views. Each trip has a different start time based on sunset time that day.

The app is as easy to use as an iPod- get what's needed in 3 steps. Choose a trip by comparing photos, watch a presentation, then create a GPS map!
