

IT Governance announces new book: The Tao of Open Source Intelligence

ELY, UK, April 28, 2015 /EINPresswire.com/ -- [IT Governance](#), the global provider of cyber security expertise, has announced that *The Tao of Open Source Intelligence*, a new book by Stewart Bertram, is now available from its e-commerce websites.

Published by IT Governance Publishing (ITGP), *The Tao of Open Source Intelligence* provides investigators with a comprehensive guide to open source intelligence (OSINT) techniques. It explains how to scrutinise criminal activity without compromising your anonymity – and your investigation.

The book describes useful add-ons for common search engines, as well as considering metasearch engines (including Dogpile, Zuula, PolyMeta, iSeek, Cluuz and Carrot2) that collate search data from single-source intelligence platforms such as Google. It catalogues and explains the tools and investigative approaches that are required when conducting research within the surface, deep and dark webs.

The Tao of Open Source Intelligence is available from IT Governance in multiple formats (including softcover, Adobe eBook, Kindle and ePub):

www.itgovernance.co.uk/shop/p-1692.aspx (International)
