

New Air Purifiers Help Homeowners Breathe Easier During Allergy Season

ServiceOne installs and maintains air purifiers which reduce contaminants in the air like mold, bacteria, viruses and smelly organic compounds.

ORLANDO, FL, USA, April 30, 2015 /EINPresswire.com/ -- With allergy season upon us, ServiceOne employs a team of professionals whose job it is to provide homeowners with the latest products and services designed to optimize [indoor air quality](#).

ServiceOne founder and president Bill Gouty believes indoor air quality should not be taken for granted; with a world full of pollutants and allergens, clean air takes more than just a well-maintained air conditioning system.

For residential and commercial areas ranging from 1,000 to 3,000 square feet, Service One recommends the new [Air Oasis Nano 9"](#) as the ideal in-duct UV air purifier. It is easily mounted inside a standard HVAC system and can improve the indoor air quality for the entire home, effectively purifying the air wherever the HVAC system reaches. The Nano 9" Induct can be installed in less than 15 minutes and requires minimal maintenance. Once installed, the Nano 9" will immediately set to work reducing carbon-based contaminants in the air like mold, bacteria, viruses, and volatile organic compounds that can cause unpleasant odors.

"The Nano 9" will continuously clean the air in the home until a replacement cell is needed, at which time a blue LED light will advise the owner to make the change," said Gouty. "Cells only need to be replaced about once every two years, making the Nano 9" Induct the best whole-house air cleaner for those who do not wish to spend a lot of time on upkeep."

Central Florida homeowners can enjoy better air quality by turning to Service One for items such as: air purifier systems that trap and kill bacteria, viruses, mold spores, allergens and other pollutants in the conditioned air, and keep them out of the air; humidifiers which are very popular in the winter by helping reduce sore throats, chapped lips, itchy skin and sinus problems; and ventilators which are designed to remove stale air from the home, while keeping valuable energy from escaping.

"Although we may not always think about it, indoor air quality may bring more pollution and irritants than outdoor air. It can present itself in the form of headaches or chronic allergies, impacting your quality of life," said Gouty. "ServiceOne will test for harmful chemicals and install

[air filters](#) to ensure you're breathing clean air in your home. We also offer UV lighting to help rid your home of harmful bacteria."

ABOUT SERVICE ONE: Founded in 2003 in Longwood, Florida, Service One is a locally owned and operated air conditioning, heating, and plumbing company. Service one repairs, services and maintains all makes and models of air conditioning, heating, and plumbing equipment and fixtures. The company serves residential and business customers in Orange, Seminole, Southwest Volusia, North Osceola and portions of Lake Counties. The company recently opened a new location in Orlando at 4556 36th Street, just south of downtown. This new office will service customers from downtown Orlando, south to Kissimmee.

Service One offers flat-rate pricing, with no hidden costs and a 100-percent satisfaction guarantee. Service One Air Conditioning is NATE certified, EPA certified, background checked and backed by excellent customer referrals. Contact: 407.966.4441 or visit www.serviceoneac.com.
