

Intermountain Healthcare Recognized as a Top Information Technology Innovator

Health Hub app featured as example of making mobile interaction easier for community

SALT LAKE CITY, UTAH, USA, May 1, 2015 /EINPresswire.com/ -- For the fourth consecutive year, InformationWeek magazine has honored Utah-based [Intermountain Healthcare](http://intermountainhealthcare.org) as one of the nation's top innovators in information technology, ranking it No. 34 on this year's InformationWeek Elite 100 list.

The magazine also awarded individual winners in eight business innovation categories, naming Intermountain the winner in the "Mobility" category. The recognition highlighted the success of Intermountain's Health Hub mobile app in connecting with patients in the way they increasingly want to interact, through mobile devices.

According to InformationWeek, organizations making the Elite 100 demonstrate a pattern of technological, procedural, and organizational innovation.

"We see the best IT leaders tearing down traditional borders to help every department leverage technologies such as data analytics, cloud, and mobility," said InformationWeek Editor Chris Murphy. "The 2015 InformationWeek Elite 100 spotlights companies at which IT is not only inseparable from every department, it's pivotal to every customer experience."

Intermountain was the only Utah organization included on the 2015 list. The winners represent 20 different industry sectors, and 18 of the 100 on the 2015 list are from the healthcare/medical industry. The three organizations on the 2015 InformationWeek Elite 100 are: 1) UPS, 2) Boeing, and 3) Jet Propulsion Lab, California Institute of Technology.

Intermountain Healthcare is a Utah-based, not-for-profit system of 22 hospitals, 185 clinics, a Medical Group with some 1,300 employed physicians, a health plans division called SelectHealth, and other health services. Helping people live the healthiest lives possible, Intermountain is widely recognized as a leader in transforming healthcare through high quality and sustainable costs.
