ISO 27001 can help organisations stay ahead of cyber security threats

ELY , UK, May 13, 2015
/EINPresswire.com/ -- IT Governance,
the global cyber security leader, is
advising organisations that an integrated
approach to people, processes and
technology is essential to stay ahead of
ever-evolving cyber threats.

Alan Calder, founder and executive
chairman of IT Governance, says, "Cyber
risk is growing exponentially and it would
be wrong to assume that organisations
can successfully protect themselves
without a proper strategy or management
system.

"Evidence suggests that ISO 27001, the
international information security management standard, is regarded as the most effective tool to
ensure an all-encompassing approach to cyber security. Every organisation should consider
implementing the Standard to mitigate cyber risk and stay secure."

The recent ISO 27001 Global Report 2015 revealed that improving information security is the biggest
driver for implementing ISO 27001 for 70% of the respondents. 51% believe that it is also the single
most important benefit of implementing ISO 27001.

ISO 27001 provides a comprehensive list of information security controls that organisations can apply
in line with their specific risks.

Implementing ISO 27001

IT Governance's ISO 27001 packaged solutions can be deployed by any company, anywhere in the
world, that wishes to implement the ISO 27001 standard and prepare for certification.

Each solution is a combination of products and services in a fixed-price, fit-for-use package sure to
meet any organisation's preferences for tackling ISO 27001 compliance projects without the
traditionally associated complexities and costs.

ISO 27001 'The Basics', 'Do It Yourself', 'Get A Little Help', 'Get A Lot Of Help' and 'We Do It For You'
packages can be booked online at www.itgovernance.co.uk/iso27001-solutions.aspx.

Alternatively, organisations can call +44 (0)845 070 1750 or send an email to request a custom quote.
