

New Concept Easy Catching Baseball Glove on Indiegogo May 11, 2015, Two Web Glove

Twoweb sports today announced the worldwide release of the 2web glove, that is equipped with 2nd web and makes it easier to catch a ball.

LOS ANGELES, CA, USA, May 12, 2015 /EINPresswire.com/ -- "One sunny day, while playing a game of base ball, we thought of what it would be like if we could increase the possibility of catching the ball," said Edward Hong, President, Twoweb Sports, Inc. "No matter who you are, the [Two Web glove](#) will raise the probability of you catching the ball, and as a result you will be able to spend more time and make more memories with the people precious to you."

Performance and Priority

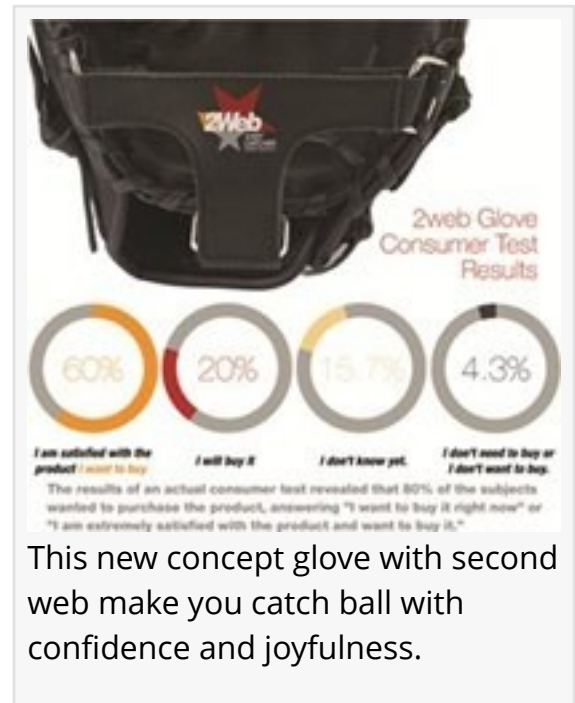

The Two Web glove is equipped with a second web guard that prevents the ball from ricocheting off. It enables people who have difficulty to catch balls easily and so maximizes the pleasure when we play with the ball.

The second web guard of the Two Web glove helps catch a bouncing ball. It protects baseball lovers who have experienced bruising after being hit on the chest or face and sometimes a black eye during baseball game because of the unpredictable bouncing of the ball more safely.

Another remarkable point is that you can use the unique function of the Two Web glove according to your preference or the situation even though its price is similar to other average gloves. When you detach the 2nd web guard, then two web glove turns into a normal [baseball glove](#).

When the 2nd web becomes a history to you, what do you do with the detached web? You can keep the web as a memento of the time spent playing catch with the people special to you.
