High risk work groups for exposure to asbestos in New Mexico include US Navy Veterans, Air Force Veterans, power plant workers, oil refinery workers, miners, manufacturing workers, plumbers, electricians, auto mechanics, machinists, or construction workers. Typically the exposure to asbestos occurred in the 1950's, 1960's, 1970's, or 1980's. <http://NewMexico.MesotheliomaVictimsCenter.Com>

According to the US Center for Disease Control the average age for a diagnosed victim of mesothelioma is 72 years old. Frequently victims of mesothelioma are initially misdiagnosed with pneumonia. This year between 2500, and 3000 US citizens will be diagnosed with mesothelioma. Mesothelioma is attributable to exposure to asbestos.
