

Ace Sheds Launch New Mobile Ready Website

Custom shed manufacturers Ace Sheds have this week launched a new mobile ready website for the busy summer months ahead.

ASHFORD, KENT, USA, May 13, 2015 /EINPresswire.com/ -- Ace Sheds currently build a wide range of garden buildings for customers in the South East, sourcing organic timber from Sweden for every project. Their range of garden buildings currently include standard sheds and workshops, premium sheds and workshops, summer houses, garden tidies, building security and building treatment.

The company say the new website is fully mobile ready for its customers.

The new website has been designed for mobile and tablet users, allowing customers the ability to easily choose a shed, customise their options and checkout fast and safely online. The new responsive design offers a combination of a liquid layout that scales images to re-flow the content and present important elements of the site including specifications, product sheets and installation instructions.

The new responsive web design is a total approach by Ace Sheds which is aimed at crafting the site to provide an optimal viewing experience, along with easy reading and navigation with a minimum of panning, scrolling and resizing.

Variety of new functions available

The company claim to have introduced a wide range of new functionality to its site, as well as improving past features. With delivery applicable to only certain postcodes in the South East of England, customers can now enter their postcode on the product detail page of their chosen building to see if they qualify for free delivery, or delivery at all.

The company have placed a keen emphasis on the customers ability to customise their shed online. The new website offers dimension scrollers and various menus including choice of cladding, framing, door and window options and extras as part of the final order process.
