

Mejor Global Now Makes Global Growth Easy for International Companies

Mejor Global Export, an outsourcing industry leader, provides an excellent opportunity for companies across the globe to enhance their businesses in Mexico.

NOVI, MI, USA, May 14, 2015 /EINPresswire.com/ -- May 14, 2015

In recent years, Mexico has seen a huge surge in mineral production. One of the highly profitable industries, the mining industry in Zacatecas has shown unprecedented levels of growth. According to Export.gov at <http://goo.gl/zWfWtC>, Mexico is the second largest export market in the US and Zacatecas is Mexico's leading producer of silver, lead and zinc. Moreover, the city is also the second largest producer of copper and third largest producer of gold in Mexico. However, for all the growth that the industry has to offer, the mining industry in Mexico still possesses a lot of untapped potential. Hence, with an aim to bridge the gap between foreign manufacturers and Large local vendors, [Mejor Global](#) seeks to boost trade. Booming in the monopoly market, Mejor Global has now become a trusted name in Zacatecas, Mexico.

Already a market leader in the mineral rich city of Zacatecas, Mexico, Mejor Global is the preferred choice of foreign manufacturers and Large local vendors. Mejor Global deals in the procurement of equipment, tools and resources needed to harvest some of the most sought after minerals in the mining industry such as Copper, Zinc, Lead, Gold and Silver. Having established its roots in Zacatecas, Mejor Global provides foreign companies with an opportunity to benefit from its vast range of knowledge and expertise regarding the ways of the local markets. Moreover, far from being reserved to the city of Zacatecas, Mejor Global has its export concierge services available in all the major mineral producing cities in Mexico.

The mining industry in Zacatecas, Mexico provides an excellent opportunity to invest in or export from. According to recent studies published by Export.gov:

- Mexico is the United States' second largest export market;
- Mexico is the United States' third largest trading partner;
- The mining sector in Mexico accounts for 4.9% of the nation's total GDP;
- Only 34% of Mexico's mining potential has been exploited

Thus, according to Mejor Global the Mexican mining industry has vast potential. However, since it is difficult for foreign companies to adapt to, or acquire the knowledge of, the Mexican market, an intermediary or export concierge has often been a prerequisite for both importing and exporting needs. Thus, Mejor Global now ensures the role of an export concierge is easily filled to make the transitions of both vendors and investors easy. The company acts as an intermediary for both foreign companies looking to sell to Mexico and for local players who seek to do business with these companies.
