With the expansion and development of Egypt's port

facilities, construction of inland and hinterland logistics facilities and development of new industrial, residential and agricultural zones, trade infrastructure in Egypt is changing fast. Collectively, these projects comprise billions of dollars worth of investment and amount to some of the largest construction and dredging projects undertaken in modern times. With tight schedules to meet and with so much at stake, the need to understand the work has never been higher.

“

We're witnessing an exciting and rapidly developing time for the ports and maritime sector in Egypt.
