

The Liposuction And Cosmetic Surgery Institute Adds More Options In Breast Augmentation In Chicago

The Liposuction and Cosmetic Surgery Institute is now offering memory shape breast implants at Chicago clinics providing more options in breast augmentation.

CHICAGO, IL, USA, May 18, 2015 /EINPresswire.com/ -- The [Liposuction and Cosmetic Surgery](http://www.lipodoc.com) Institute of Chicago has announced the addition of two new types of breast implants. Chicago women now have even more breast enhancement options available to them thanks to [Dr. Leon Tcheupdjian M.D.](#) (Dr. T) and his team. The new implant options are called MENTOR® and Natrelle®. Both products feature memory shape designs that mirror and enhance a woman's natural shape.

"These memory shape breast implants are not round like the standard breast implants. They are thinner at the top and fuller at the bottom, which mimics the actual shape of the breast. This makes them a very good choice for women who want a natural, youthful look and feel or who don't want their implants to be obvious," explained Leslie Forrester, R.N., B.S.N.

The MENTOR® brand of breast implants are filled with a cohesive gel and have a unique, tapered appearance. The Natrelle® implants are also teardrop shaped but are filled with silicone gel. Both brands feature a gentle imprinting process which helps keep the implants in place for years afterward. Both products can be used for breast augmentation or for reconstructive surgery and consistently rate high in patient satisfaction surveys and among physicians.

"Choosing the right procedure and the right type of implant is vital to a patient's satisfaction with the end result. Having two more options for women to choose from will only lead to greater patient satisfaction, but that does not mean that memory shape implants are right for every woman. With so many options available, it is more important than ever for a woman to discuss her goals for the surgery with her physician before settling on a product," said Dr. Leon Tcheupdjian M.D., Founder/Medical Director Liposuction and Cosmetic Surgery Institute, Chicago (<http://www.lipodoc.com>).

Dr. T went on to explain that he and his team always undertake a thorough consultation with

their patients to match them to the right product for this very personal procedure. The Liposuction and Cosmetic Surgery Institute is one of the first clinics to offer memory shape [breast augmentation in Chicago](#). The MENTOR® product in particular was only recently approved by the FDA for use in the United States, although it has been a popular and successful option in breast augmentation overseas for the last 10 years.

Both implant options will be available at all four of the Institute's Chicago-area locations: Chicago's Gold Coast, Arlington Heights, Naperville, and Oak Brook.
