

VCE Technology Alliance Partner Centerity (TM) Certified as VCE Vblock Ready(TM)

Vblock Ready Certification Bringing Simplicity, Agility, and Performance to Converged Infrastructures.

BOSTON, MA, USA, May 20, 2015 /EINPresswire.com/ -- Centerity today announced that Centerity Monitor is now certified as a Vblock Ready™ solution through the VCE Technology Alliance Partner (TAP) program. The TAP program is designed for independent software vendors, hardware manufacturers, virtual appliance vendors and other technology providers looking to simplify and accelerate their solutions for deployment with [VCE Vblock Systems](#).

Centerity Systems, Inc., the pioneer developer of enterprise-class and carrier-class IT monitoring solutions for complex, hybrid IT environments (physical, virtual, application and cloud), is teaming with VCE, the worldwide leader in [converged infrastructure](#), to bring Centerity's unique IT monitoring and Business Service Management (BSM) capabilities to Vblock customers world-wide. Centerity delivers end-to-end IT monitoring coverage that provides a business intelligence layer across the Vblock System as well as to other supporting technologies. With customizable executive dashboards and business analytics plus real-time predictive, trend and root cause analysis, Centerity adds to the performance, scalability, automation and agility of Vblock deployments. Due to Centerity's unique ability to do correlated impact analysis across technology domains, it can provide executives and operators with actionable intelligence and business value by reducing data center complexity and OPEX.

Vblock Systems integrate leading Cisco networking and servers, [EMC storage](#) and VMware cloud infrastructure technologies into a single intelligent converged infrastructure system with seamless support. This certification provides customers with the assurance that Centerity Monitor will interoperate with Vblock Systems.

"Any company leveraging the full capabilities of the Vblock converged infrastructure cannot afford anything less than complete visibility into this technology stack," says Marty Pejko, COO of Centerity. "Due to the unique advantages of our unified platform deliverable as a single software appliance, we are the only IT monitoring solution that has the extensibility, scalability and flexibility needed to deal with growing data center complexity in today's dynamic IT environments. This is especially true of public and private cloud applications and Big Data Layer deployments of SAP HANA, Hadoop and NoSQL."

"VCE is pleased to welcome Centerity as a Technology Alliance Partner for VCE Vblock Systems," said DJ Long, senior director, Technology Alliances, VCE. "As a VCE TAP partner, Centerity can now integrate its products with Vblock Systems, delivering transformative data center solutions for mutual customers that enable the agility, simplicity and economics of converged infrastructure with Centerity's expertise in hybrid IT environment monitoring and Business Service Management."

VCE works with Superna™ to conduct and administer Vblock System certifications for VCE TAP program members. This certification enables mutual channel partners and customers to accelerate adoption of Vblock Systems while leveraging Centerity's solutions for end-to-end IT Monitoring and Business Service Management (BSM) for mid to large enterprises, Managed Service Providers (MSPs), and Cloud Service Providers (CSPs).
