

# Spa Valley Natural Skincare Launches New Organic Anti-Aging Line

*Spa Valley Natural Skincare launched a new line of natural organic skincare products for dry, sensitive, and mature skin.*

ROYAL TUNBRIDGE WELLS, KENT, UNITED KINGDOM, May 25, 2015 /EINPresswire.com/ -- Well-known beauty expert and book author [Julie Gabriel](#) has created a new range of organic skincare products to rejuvenate and repair aging skin.

Organics is the fastest growing segment of the global personal care industry. Many health diseases are associated with the use of synthetic personal care products due to the presence of chemicals such as phthalates, petroleum-based chemicals, parabens and aluminum salts among others. Thus, consumers prefer organic personal care products which are non toxic and also environment friendly.

But when it comes to efficacy, organic products often lag behind. Natural skincare lines taut the use of botanical oils, plant extracts, and vitamins, but their products often lack truly the best in active anti-aging skincare ingredients. Skincare lines that do focus on high-grade advanced ingredients often come with high-grade price tags to match and are difficult to come by without making a trip to a boutique or spa.

Spa Valley Naturals product line fills the void with an affordable, top-quality products featuring advanced antioxidants and age defying ingredients like botanically-derived hyaluronic acid, advanced

peptides, and plant ferments that perform better than Botox or retinol. These cleansers, moisturizers and [anti-aging serums](#) are ideal for delicate [sensitive skin](#) and contain no parabens or other toxic preservatives, petrochemicals, synthetic fragrance, or chemical sunscreens.

With over 20 new products to choose from, Spa Valley's new line seeks to help correct issues like dryness, collagen loss, hyper-pigmentation, puffiness and sagging.

More than 80% organic, our Firming Treatment Body Cream is excellent for dry mature skin.

"My mission is to create the most effective and user-friendly skincare products for people with sensitive skin. Most often so-called "hypoallergenic" products are loaded with irritants - chemical preservatives, synthetic fragrance, pore-clogging petrochemicals. I have refused to use any of that junk. I also do not use animal-derived ingredients. Instead, I took organic aloe and rose, added some of the most advanced natural antioxidants and peptides, allergen-free plant actives, and the result is simply fantastic. I use all my products and I get lots of compliments how lovely my skin is," says Gabriel.

More consumers prefer organic personal care products which are non toxic and also environment friendly. By using Spa Valley they are keeping their skin healthy through natural products that are certified at least 90% organic by EcoCert. To prevent the need for preservatives, as well as maintain shelf life, Spa Valley packages all products in airtight containers.
