

Herpes Zoster: Israeli Scientists Gain Breakthrough Understanding of VZV; CBCD Reviews a Report

Researchers from Bar Ilan University use nerve cells grown in a lab to create the first lab model of the varicella zoster virus. (1)

ROCHESTER, NEW YORK, UNITED STATES, June 10, 2015
/EINPresswire.com/ --

“Infected with the varicella zoster virus (VZV)? The CBCD recommends taking [Gene-Eden-VIR](#) or [Novirin](#).” - Greg Bennett, CBCD

Herpes zoster is a condition caused by a herpes virus. The varicella zoster virus causes chickenpox, and later in life the virus can cause herpes zoster (shingles). Now, researchers from Israel have created a breakthrough in the fight against this virus. “Israeli scientists have created a stable state of dormant herpes in nerve cells grown in the lab. They also managed to reawaken the ‘sleeping’ (latent) virus under controlled conditions, a scientific first.” (1) Scientists created a model that mimics both the latent and active phases of the virus lifecycle.

It should be noted that the model the scientists made “isn't an exact emulation of our human reality. We can host the dormant virus forever. At this point, the lab has hosted dormant VZV in nerve cells in a petri dish for seven weeks.” (1)

Scientists have been trying to understand the underlying biological mechanism that causes the virus to “wake up.” This is important, because it is only when the VZV reactivates from a latent state that it goes on the attack and causes shingles. If scientists were able to keep the virus in a latent state forever, shingles could become a disease of the past. Until this happens, and newer, more effective treatments are developed, the Center for the Biology of Chronic Disease (CBCD) recommends that anyone who has ever had chickenpox take Gene-Eden-VIR or Novirin. The

guidelines.

The formula of Novirin and Gene-Eden-VIR was tested by Hanan Polansky and Edan Itzkovitz from the Center for the Biology of Chronic Disease (CBCD) in two clinical studies that followed FDA guidelines. The studies showed that the Novirin and Gene-Eden-VIR formula is effective against viruses in the herpes family, including HSV-1, HSV-2, the Epstein Barr Virus (EBV), the human cytomegalovirus (CMV), and others. The clinical studies were published in the peer reviewed, medical journal Pharmacology & Pharmacy, the first, in a special edition on Advances in Antiviral Drugs. Study authors wrote that, "individuals infected with a (herpes virus)...reported a safe decrease in their symptoms following treatment with Gene-Eden-VIR." (2) The study authors also wrote that, "We observed a statistically significant decrease in the severity, duration, and frequency of symptoms." (2)

Both products can be ordered online on their websites here:

Gene-Eden-VIR and Novirin are natural antiviral dietary supplements. Their formula contains five natural ingredients: Selenium, Camellia Sinesis Extract, Quercetin, Cinnamomum Extract, and Licorice Extract. The first ingredient is a trace element, and the other four are plant extracts. Each ingredient and its dose was chosen through a scientific approach. Scientists at polyDNA, the company that invented and patented the formula, scanned thousands of scientific and medical papers published in various medical and scientific journals, and identified the safest and most effective natural ingredients against latent viruses.

To date, Novirin and Gene-Eden-VIR are the only natural antiviral products on the market with published clinical studies that support their claims. Note: Novirin has the same formula as Gene-Eden-VIR. However, it contains higher quality and more expensive ingredients.

As noted above, "Shingles is caused by the varicella zoster virus, the same virus that causes chickenpox. After a person recovers from chickenpox, the virus stays in the body in a dormant (inactive) (latent) state. For reasons that are not fully known, the virus can reactivate years later, causing shingles." (3).

"Because the shingles virus can be triggered through a decline in the immune system ... due to stress or other factors, we recommend stress reducing activities, and taking Gene-Eden-VIR or Novirin. The formula of these natural antivirals was designed to help the immune system target the latent form of the virus." – Greg Bennett, CBCD

Those interested in learning new and interesting facts on VZV infection are encouraged to like the Gene-Eden-VIR Facebook page, here:
