

Xeropan – The solution to language learning

Going against the grain and made language learning approachable, fun and engaging, a social experience available anytime and anywhere.

DEBRECEN, HAJDU BIHAR, MAGYARORSZÁG, June 11, 2015 /EINPresswire.com/ -- Today's education system generally requires separate books, workbooks, audio and of course, a teacher, which just makes learning impractical. Learners cannot have the teacher follow them around everywhere; they cannot always take their heavy books and workbooks with them. On the other hand, people who speak at least one foreign language earn more, handle difficulties more easily and they can even choose from many opportunities in their lives. So, certainly, they will have better opportunities if they learn English. Their knowledge will last for a lifetime, all they have to do is to practice 5 minutes a day. Xeropan is an smartphone app available on iOS and Android that makes language learning exciting and easy through up-to-date news, articles videos and also, everyday situations and topics in 8 different languages. It offers useful and interesting expressions which can help them in many everyday situations. The daily lessons are based on a wide variety of topics, anyone can find one regardless of their taste, age or gender. Xeropan's goal is to develop a service that is as good as having a one-on-one tutor. Xeropan is not just an application, but more like an experience and a great opportunity to immerse in authentic material.

The app is recommended to people who are just getting familiar with English or getting prepared for their language exam and also those who speak English fluently. Basically anyone who is willing to make progress, who have goals, and the

desire to speak a language effectively to reach their goals. If you want to find out more about the app, look here:
