ITpreneurs Expands Courseware Library with NIST CyberSecurity Foundation

ITpreneurs NIST CyberSecurity Foundation course has been developed to help businesses learn about the basic information security concepts and techniques.

ROTTERDAM, NETHERLANDS, June 11, 2015 /EINPresswire.com/ -- ITpreneurs has added NIST CyberSecurity Foundation Course to its courseware library of IT training content for licensing. The course is based on the NIST CyberSecurity Framework which was created through collaboration between industry and government. NIST consists of standards, guidelines, and practices to promote the protection of critical infrastructure. ITpreneurs NIST CyberSecurity Foundation course has been developed to help businesses learn about the basic information security concepts and techniques.

By offering this training to clients, training businesses can help organizations to improve the effectiveness and efficiency of CyberSecurity Management. This will be achieved by implementing a world class best practice and framework for consistent, concise security administration. Furthermore, it helps them to improve their preparedness to mitigate or eliminate all known risks and threats.

This course is a good fit to an existing cyber security training portfolio as well as complementary to IT service management, and security architecture courses. Target audiences for the course includes Risk, security or cyber security managers, Business process owners, Business risk managers, Regulatory compliance managers, Project managers and individuals responsible for cyber security within an organization.

The course consists of five primary modules that address NIST CSF Identify, Protect, Detect, Respond, and Recover. In addition, it introduces GAP Assessment and four tiers of capability and maturity created to help organizations plan their CyberSecurity Roadmap. The knowledge captured and communicated in this course can be immediately applied by organizations around the globe to ramp up to meet their legal obligations defined by newly introduced statutory and regulatory acts. View course fact sheet for full details.

As owners of training business, you can take advantage of our growing content library to better address the needs of new and evolving demands of your customers. Browse our courseware library and start using our ready-to-use content to deliver IT trainings to your clients. Get in touch with us and discover a new way to grow and run your business.
