NEW YORK, NY, USA, June 18, 2015 /EINPresswire.com/ -- At this era of information explosion, data or documents is the crux of the matter of safety or economic benefits. Keeping sensitive business programs safe often determines the success of enterprise management and business continuity. Efficient business administration is sure to attach great value at saving and backing up crucial data and control the implementation of protection plans. EaseUS Software (www.todo-backup.com), a leader in data backup

EaseUS Puts Forward Backup Solutions for Business

and recovery software, keeps a watchful eye on business users' development with a view to practical use of its products. EaseUS backup solution is known as a comprehensive yet cost-saving backup and recovery technique for optimum business performance. EaseUS Todo Backup Software, with over 10 years research and development, becomes a reliable platform with lots of unique features. Data backup is realized in three ways: full backup, incremental backup or differential backup. Also it may occur on schedule. It's advantageous of EaseUS Todo Backup Software to achieve system, file, partition, Outlook email, Exchange server or SQL server backup and recovery. Simple and time-saving backup makes it profitable for business as far as cost effectiveness.
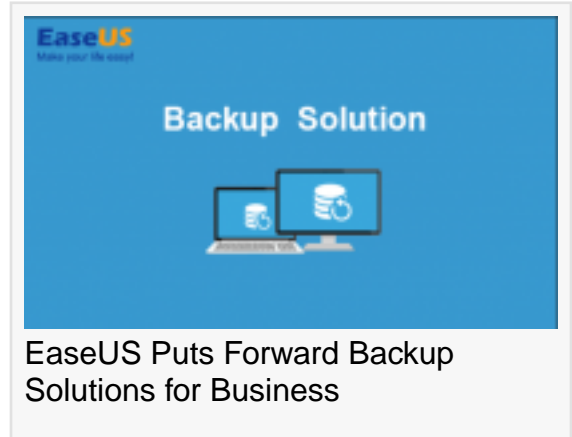

EaseUS Todo Backup Software, coupled with EaseUS Central Management Console, helps commercial users centrally control and monitor backup process in the same network. This robust IT solution simplifies IT administration routine. Business administrators are able to automatically create system or partition backup policy and then apply such plans to desired destinations. Up-to-date reports show the detailed deployed policies and backup process for result reference.

For business, it's beneficial to integrate the centralized management, deployment and control over different devices connected to the corporate network with heavy data protection. EaseUS Deploy Manager within one efficient backup solution managed by a single, easy-to-use console allots schedule backup policies for different devices. This powerful joint solution supervises complete backup to optimize deployment procedure. This simplified method is friendly to resource conservation.

With EaseUS backup solution, business confidential data or programs can be safeguarded against unexpected threats. Meanwhile, it's prospective to secure commerce sustainability, enhance business productivity and occupy more market place together with a high level of security and execution which cost less efforts.
