

Creative BioMart Introduces Exclusive Range of Quality GDF11 Proteins

Creative BioMart launched an exclusive range of quality GDF11 proteins to assist scientists worldwide.

SHIRLEY, NEW YORK, UNITED STATES, June 18, 2015

/EINPresswire.com/ -- [Creative BioMart](#),

a world leading supplier of innovative protein research tools and services announced today that it has launched an exclusive range of quality GDF11 proteins for various applications like for the anti-aging researches.

GDF11 protein, the official full name of which is growth differentiation factor 11 protein, is a member of the bone morphogenetic protein(BMP) family and the TGF-beta. Studies in mice and Xenopus suggest that this protein is involved in mesodermal formation and neurogenesis during embryonic development. GDF11 protein was also discovered to have the potentiality to make the heart of elder mouse to be younger.

The majority of the new GDF11 proteins are developed by Creative BioMart's latest technologies. Each proteins are produced and extensively validated by Creative BioMart's scientists. According to the official speaker in Creative BioMart in the product release meeting, this series of products include recombinant proteins like: [Recombinant Mouse Gdf11 protein](#), Recombinant Human GDF11, His-tagged, etc.; cDNA Clone like [Mouse Gdf11 cDNA clone\(NM_010272.1\)](#), Mouse GDF11 ORF clone(NM_010272.1), etc.; and GDF11 antibodies.

"We're excited about the opportunities that Creative BioMart's GDF11 proteins will bring to global researchers undertaking anti-aging and other related researches. We will always try our best to meet our customer's needs and bring whatever they want."

-Linna Green, Chief Marketing staff, Creative BioMart
