

## Endorsed by GGFR, the 4th Annual Flare Management Summit to include speakers from SABIC, RasGas, Borouge and more

*Flare management experts are due to meet at the Middle East's 4th Annual Flare Summit this October endorsed by Global Gas Flaring Reduction Partnership (GGFR).*

DUBAI, UNITED ARAB EMIRATES, June 28, 2015 /EINPresswire.com/ -- Oil and gas companies in the Middle East region have been continuously focusing on reducing GHG emissions and the level of gas flared. Since the fall in oil prices has

caused companies to reduce expenditure, saving and utilising this associated gas has become crucial since it will help increase operational profit.

International flare management experts are due to meet at the Middle East's 4th Annual Flare Management Summit this October in Abu Dhabi, organised by IQPC Middle East and endorsed by Global Gas Flaring Reduction Partnership (GGFR). The 4-day annual event provides a platform for stakeholders to discuss the most recent, cost-effective and innovative methods for flare gas recovery and how to improve methods for accurate flare flow measurement, flare gas chromatography, recovery and utilisation.
