

Aging Damages the Immune System; The CBCD Examines the Medical Evidence

The immune system functions less efficiently as the body ages, leaving an individual open to viral infections. (1)

ROCHESTER, NEW YORK, UNITED STATES OF AMERICA, July 2, 2015 /EINPresswire.com/ --

“Infected with a latent virus? The CBCD, which conducted two separate post-marketing clinical studies on the natural, antiviral formula of [Gene-Eden-VIR](#) and [Novirin](#), recommends taking one of these effective remedies to help the immune system target viruses in a latent state.” - Greg Bennett, CBCD

Research now shows that the process of aging leads to a reduction in the ability of the immune system to protect against viral illnesses. This “contributes to more infections, more inflammatory diseases, and more cancer.” (1) According to Harvard University, “While some people age healthily, the conclusion of many studies is that, compared with younger people, the elderly are far more likely to contract infectious diseases. Respiratory infections, influenza, and particularly pneumonia are a leading cause of death in people over 65 worldwide. No one knows for sure why this happens, but some scientists observe that this increased risk correlates with a decrease in T cells, possibly from the thymus atrophying with age and producing fewer T cells to fight off infection.” (1)

Importantly, it should be noted that “other researchers are looking at the

connection between nutrition and immunity in the elderly ... one important question is whether dietary supplements may help older people maintain a healthier immune system.” (1) The Center for the Biology of Chronic Disease (CBCD) believes that clinically backed, antiviral dietary supplements help boost the immune system against the harmful effects of viruses in the latent state. Two such products

are Gene-Eden-VIR and Novirin. These natural antiviral supplements have a formula that was tested in two post-marketing clinical studies that followed FDA guidelines.

Click to learn more about [latent viruses](#).

The studies showed that the Gene-Eden-VIR and Novirin formula is effective against latent viruses, such as HPV, HSV-1 and HSV-2, the Epstein Barr virus, the human cytomegalovirus, and hepatitis B and C. The clinical studies were published in the peer reviewed, medical journal Pharmacology & Pharmacy, the first, in a special edition on Advances in Antiviral Drugs. Study authors wrote that, “individuals infected with the HPV...reported a safe decrease in their symptoms following treatment.” (3) The study authors also wrote that “we observed a statistically significant decrease in the severity, duration, and frequency of symptoms.” (3)

Gene-Eden-VIR and Novirin can be ordered through their respective websites, here:

and

<http://www.novirin.com>

Gene-Eden-VIR and Novirin are natural antiviral dietary supplements. Its formula contains five natural ingredients: Selenium, Camellia Sinesis Extract, Quercetin, Cinnamomum Extract, and Licorice Extract. The first ingredient is a trace element, and the other four are plant extracts. Each ingredient and its dose was chosen through a scientific approach. Scientists at polyDNA, the company that invented and patented the formula, scanned thousands of scientific and medical papers published in various medical and scientific journals, and identified the safest and most effective natural ingredients against latent viruses. To date, Gene-Eden-VIR and Novirin are the only natural antiviral products on the market with published clinical studies that support their claims.

The Harvard researchers wrote that some dietary supplementation may be beneficial for older people. (1) they went on to note that “Everyone’s immune system is unique. Each person’s physiology responds to active substances differently. So if your grandmother says she’s been using an herbal preparation for years that protects her from illness, who’s to say that it doesn’t?” (1) The CBCD points out that when it comes to Gene-Eden-VIR or Novirin, you don't have to trust to someone's opinion.

Interested individuals can read the actual clinical test results on the formula of these natural products, which were published in peer reviewed medical journals, here:
