

InstantGMP Adds Barcode Scanning, New E-signature Scheme and Custom Logos

InstantGMP will release updates to their manufacturing software on July 9th, which will include a barcode scanner in addition to requested improvements.

CARY, NC, USA, July 7, 2015 /EINPresswire.com/ -- [InstantGMP](#) announces their latest features and improvement to its Manufacturing Execution System. In the latest version, InstantGMP customers will find a new barcode scanning solution that makes material handling easier. Users can also use the barcode scanning capabilities to scan a badge to sign off on materials, [master production records](#), batch production records and other production tasks required by cGMP.

"We are excited about providing this new functionality for our customers," said Dr. Richard Soltero, President of InstantGMP. "This marks a new level of interaction that will improve usability of the software and enhance productivity during manufacturing."

In addition to the barcode scanning capabilities, InstantGMP also included the ability to hide manufacturing records not in use and added an option for customers to include their own logos on InstantGMP screens.

Improvements to the software include new mechanisms for adding attachments and a redesign of export functionalities. Customers can now view and sort reports within InstantGMP in addition to downloading them.

InstantGMP MES v2.051 will be available on Thursday, July 9th. For questions on how you can use InstantGMP to streamline your supplement manufacturing facility and improve [GMP compliance](#), visit [InstantGMP.com](#).
