

HeadcaseGames.com releases JumpBurger for iOS

Independent developer releases Jumping Hamburger game for iPhone & iPad devices

LOS ANGELES, CALIFORNIA, UNITED STATES, July 10, 2015
/EINPresswire.com/ -- Headcase Games (<http://headcaseGames.com>), in conjunction with development partner Billy Hugs (<http://billyhugs.com>), is pleased to announce the release of their new iOS title JumpBurger, now available as a free download on the iTunes App Store.

JumpBurger is a casual-friendly action game, making use of established mechanics wherein the protagonist, an adventurous anthropomorphic hamburger, ascends ever upward, collecting items and dodging obstacles.

The player starts out against a beautiful

meadow backdrop, and must guide the jumping sandwich toward suspended platforms as the world opens up behind him. In his path are several condiments (pickles, cheese, olives and whatnot) which increase the burger's deliciousness, as well as the potential for high score. Numerous other items may be collected during the journey, in service of this same goal.

Though simple to learn, the game becomes challenging very quickly, as obstacles increase and the margin for error shrinks, providing for quick and addictive bursts of play. GameCenter Achievements and numerous sharing options enhance the gameplay experience, complemented by beautifully-rendered graphics and engaging and humorous sound effects.
