

Hair Replacement Company, DermateX Opens New Location in Laguna Hills

Following 25 years in business in San Diego, locally-owned hair restoration company has announced the opening of their new Laguna Hills office.

LAGUNA HILLS, CALIFORNIA, U.S., June 22, 2015 /EINPresswire.com/ -- PRLog - June 22, 2015 - LAGUNA HILLS, Calif. -- Recognized among the top 5% of hair replacement studios nationwide, DermateX has expanded their San Diego location to Laguna Hills Ca. Located at 23201 Mill Creek Drive, Ste 225, the new studio features the same top-quality hair restoration services that include DermateX's cutting edge non-surgical hair restoration for men and women as provided in their San Diego location. This new location is called DermateX Hair Orange County.

It's been noted by the American Hair Loss Association that, "Hair loss is mistakenly thought to be a strictly male disease, yet women actually make up 40% of American hair loss sufferers. Hair loss in women can be absolutely devastating for the sufferer's self-image and emotional well-being." This percentage estimates to about 30 million American women who suffer some

form of hair loss in their life.

Being that hair and self-image are so closely intertwined, DermateX has worked closely with patients to provide the perfect hair restoration service that focuses on issues that include: alopecia, diffused hair loss, male pattern balding, or undergoing a medical procedure causing hair loss.

In the past seven years their company has pioneered a breakthrough in the field called "virtual reality hair" for men and women. This process has been highlighted on Good Morning America (<https://youtu.be/0ji1f08R-Dk>) and the Montel Williams show (<https://youtu.be/dlWHxg5-Bjk>). The technique involves applying an invisible, non-surgical derma lens, much like a contact lens, into which human hair is inserted, compatible in color, density, curl pattern, texture, etc. with no home maintenance other than washing, conditioning and normal styling.

"This is a great alternative to hairpieces and wigs but most people are not aware they exist, especially women," explains DermateX President, Nick Karagozian. "Unlike wigs and hairpieces, virtual reality hair is incredibly natural, both to the eye and to the touch."

DermateX also utilizes laser therapy for people in the beginning stages of hair loss as an effective method to stop hair loss and achieve healthier, thicker, and fuller looking hair. The company is

currently offering a free hair and scalp analysis using the latest in microscopic imaging.

About the company:

Founded in 1987, Dermatex is conveniently located in San Diego, California and now recently, Laguna Hills Ca. They're considered pioneers in southern California by offering state-of-the-art hair restoration. As a professionally managed and customer-focused company, Dermatex Hair San Diego and Dermatex hair Orange County pride themselves on longevity, creativity, customer satisfaction, and results.
