

Meth Lab Cleanup Company Introduces the Black Box Reader

Meth Lab Cleanup® Company introduces the Black Box Reader™ Digital Home Meth Test

ATHOL, ID, UNITED STATES, July 13, 2015 /EINPresswire.com/ -- The Black Box Reader™ is a digital monitoring device designed for [Meth Lab Cleanup®](#) Company for the quantification of methamphetamine residue using later-flow assay and electronic line intensity reading. AccuMeth® is an easy-to-use, nonhazardous, immediate result home methamphetamine test with a detection level recognized by all regulated states in the nation.

Athol, ID: Meth Lab Cleanup® Company (MLCC) offers the Black Box Reader™ and AccuMeth® Immediate (patent pending) an onsite immediate result and digital [home meth test](#) reader of superb quality and performance. Meth Lab Cleanup®'s onsite kit utilizes a lateral-flow immunoassay, visually-read application; much like a pregnancy test. The Black Box works in conjunction with AccuMeth® to provide the exact amount of methamphetamine in a sample, onsite, immediately. Now, child protective services, law enforcement, renters, landlords, realtors, home inspectors, prospective buyers and clandestine drug lab technicians can have highly reliable, quantitative results within five minutes of application. Test results are positive or negative for methamphetamine residue at 0.1 µg/100cm²; the most recognized legal standard in the nation.

According to Julie Mazzuca, President, Meth Lab Cleanup®, "The Black Box Reader™ is extremely precise, offering results with an average deviation of only 9.1%. Most laboratories allow for a 20% deviation. The Black Box Reader™ also includes a radio-frequency identification device (RFID) to store information on the AccuMeth® cassette. The information can then be downloaded into a computer. AccuMeth® is much easier to use than other onsite meth tests. And after use, the components are considered common household waste unlike our competitor's kit which must be disposed of as hazardous. Also, given the precision, our kits are the most affordable on the market."

Meth Lab Cleanup® Company leads the clandestine drug lab assessment and decontamination industry in technology development initiatives focusing on environmentally friendly applications, equipment, methodology and testing products. Meth Lab Cleanup® Company is an environmental firm on the forefront of the clandestine drug lab decontamination industry. Recognized for excellent customer service and industry-leading technical expertise, Meth Lab Cleanup® has been specializing in comprehensive site assessment, work plan development, regulatory adherence, full service decontamination and quality documentation for over 12 years.
