

# New Short Tandem Repeat (STR) Profile Service Released by Creative Bioarray

*Creative Bioarray has recently announced it's new Short Tandem Repeat (STR) Profile service to research community.*

NEW YORK, NEW YORK, USA, July 16, 2015 /EINPresswire.com/ -- [Creative Bioarray](http://CreativeBioarray.com), an innovative biotechnology company who offers a comprehensive range of cell services related to customized cells, immortalized primary cells and etc, has recently announced it's new cell service-[Short Tandem Repeat \(STR\) Profile](#) to fulfill the growing customer demands in cell research community.

Actually, the STR analysis is quite critical for researchers to verify the identity of human cell lines. Thus Creative Bioarray provides the [STR DNA profiling](#) service to help scientists generate unique DNA signatures, which can be used to authenticate cell lines and detect contamination of more than one cell type. The cell services Creative Bioarray provided are also based on a number of different organs, depending on clients' needs.

Highlight:

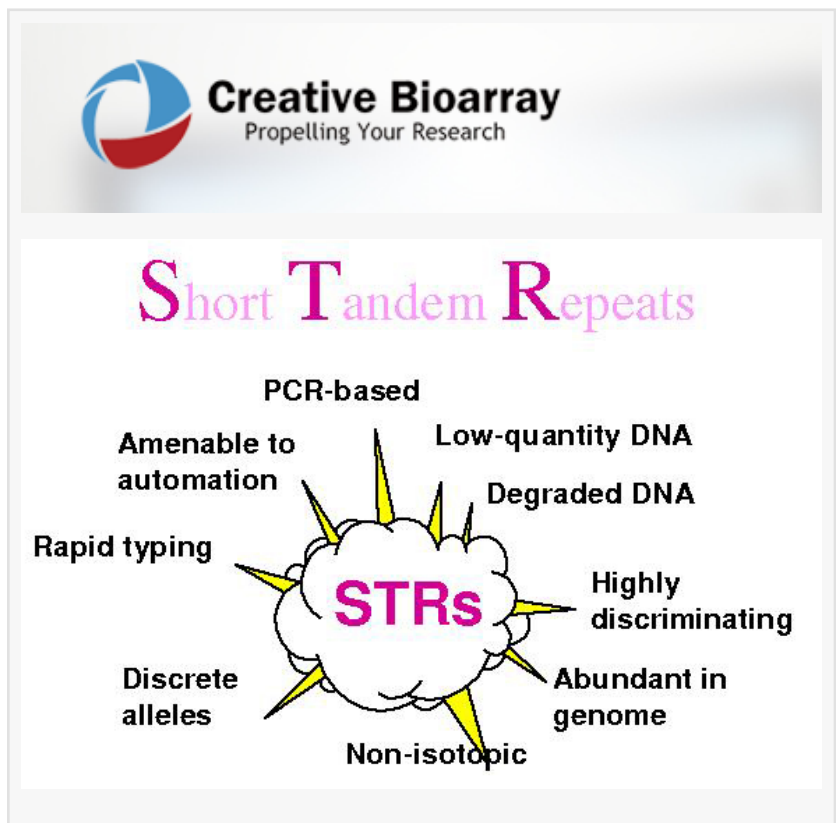

We've cooperated for years. They always try their best to solve my problems and constantly strive for perfection. We can truly rely on their expertise and high quality cells products and services.

*Dr. Victor E. Adams, one of the clients of Creative Bioarray*

- Establish an STR profile of a newly derived or reprogrammed cell line
- Complete STR profile report by request
- Monitor identity of a cell line
- DNA extraction and amplification included
- Cross contamination detection and analysis
- STR profile comparison analysis
- Bioinformatics Database Analysis

Since its foundation, Creative Bioarray always devote itself to providing customers with the best and professional products and services. Through nearly ten year's hard working and depending on its professional work team, Creative Bioarray has also successfully satisfied the needs of clients both

domestically and internationally.

To know more related information about the STR Analysis Service, please contact Creative Bioarray by calling 1-631-626-9181 or via e-mail at [info@creative-bioarray.com](mailto:info@creative-bioarray.com).

About Creative Bioarray(<http://www.creative-bioarray.com>):

Found in 2004, Creative Bioarray is an innovative biotechnology company whose mission is to develop unique technologies that provide researchers with the tools to investigate life science.

Creative Bioarray provides a wide range of high quality normal human and animal cells, cell culture medium and reagents, FISH probes, tissue array, microorganisms, equipments and related services for the research community. Their products are currently used around the world in the biological laboratories of universities, government institutes, biotechnology and pharmaceutical companies in more than 50 countries and districts.
