

# Pothole! - Game Now Available for Free on the App Store

*Drag your car left and right to steer clear of giant potholes! It's easy to play but challenging to master. How many potholes can you avoid?*

PLAINVIEW, NEW YORK, USA, July 20, 2015 / EINPresswire.com/ -- Plainview, New York - [Hirshmania! LLC](#) is pleased to announce the official release and immediate availability of [Pothole! 1.0](#), their new arcade style game developed for iPhone, iPad and iPod touch devices. In Pothole!, the objective is to navigate a car through a street littered with potholes and avoid as many as possible. Pothole! has an intuitive control scheme that allows the gamer's thumb or finger to essentially become the on screen vehicle. Steering left and right is accomplished by placing a thumb or finger on the screen and dragging it in the desired direction.

Gameplay is immediately challenging and the difficulty level remains consistent through each game session, rather than slowly increasing with time. This is because Pothole! game sessions will typically be quick, and experienced players will be more inclined to start a new game even if they only have a few minutes to spare because they know the game won't make them wait for a challenge.
