

# SLOW DOWN AGING - SCIENCE FICTION IS NOW SCIENCE FACT

*Real Science from an established longevity research company. A dietary supplement formula with longevity peptides for slowing aging at the level of cells & DNA*

WORLDWIDE, WORLDWIDE, July 24, 2015 /EINPresswire.com/ -- Dietary supplements that enrich cells deficient in important natural nutrients and assist in extending lifespan potential are now a scientific fact of life.

A British company established in 2003 and specialising in [longevity research](#) operates a free members club for what it calls "co-researchers" who are interested in following such research. The club allows members to try out cutting edge products for themselves that are available to them at prices far below what the rich and famous have been paying in recent years.

Science fiction is now science fact

*Tony Mackenzie - founder*

The club, under the name of 21st Century Alternatives, currently has a growing worldwide membership and recently adopted the name of The Longevity Revolution™. In addition to their free members they also have a growing number of dealers and informed practitioners who pay a small registration fee in return for substantial trade discounts on small quantities.

They are now making an important announcement about three new products and services:-

1. A free to view online TV channel at [www.thelongevityrevolution.tv](http://www.thelongevityrevolution.tv) with hundreds of informative videos about the history of longevity research, discoveries and breakthroughs.
2. A new dietary supplement called SLF that combines the best longevity ingredients at a breakthrough low cost. The formula is based on advanced Russian research going back 40 years into what are becoming known as [longevity peptides](#). Some of these peptides are now arriving from Russia into Western markets as individual peptide products. They have been sold over the counter in Russia and already used by 15 million people. The British made product SLF, which stand for Scientific Longevity Formula, offers a unique combination of the very best ingredients in a single capsule.
3. Apart from overcoming nutritional deficiencies in cells, one of the aims of achieving an extended

The Longevity Revolution™

The Mackenzie Protocol  
UK Telomere Testing

healthy lifespan from such ingredients is to increase the length of telomeres which are components of DNA and the subject of a Nobel prize award in 2009. Telomeres are now recognised by scientists as an important factor in longevity.

The Longevity Revolution™ now offers worldwide telomere length measurement at home using a low cost DNA saliva testing kit. Inexpensive, simple and effective without the need for a blood test or clinic appointment, the kit simply has to be returned to the laboratory for a report which can be used to identify improvements in telomere lengths when undergoing dietary supplement protocols.
