

# This is Why Liquid Chalk is Better than Chalk

*5 Reasons Why Liquid Chalk is Better Than Chalk.*

MINNEAPOLIS, MN, UNITED STATES, July 27, 2015 /EINPresswire.com/ -- After more than two centuries of existence, chalk has finally met its match, following the recent introduction of the revolutionary liquid markers. For those who are on the fence about these new writing tools, here are five reasons why [chalk markers](#) are the best thing since sliced bread.

## 1. Erasable

Marks made by the typical chalk are require tonne loads of elbow grease to erase but marks made by chalk markers are easily erasable. All that's needed is a wet, damp cloth and any marks made are erased just like magic.

## 2. Works on all non-porous surfaces

The inflexibility of chalk is one of the reasons that's causing them to lose their appeal. Chalks can only be used on chalkboards and concrete surfaces. Chalk markers are versatile and can be used on any non-porous surface. So there's no need to bear the extra expense of getting a chalkboard.

## 3. Lasts Longer

Consistent use of a stick of chalk can last for about two days. Furthermore, there exists the strong possibility that it may break- making it quite awkward to use. Chalk markers can last for weeks, even months based on the frequency of use.

## 4. Dustfree

The dust free characteristic of chalk markers is probably its most valuable characteristic. Chalks are well known for the dust particles that fly about when they are used. Studies have shown that the inhalation of chalk dust could be harmful to persons prone to allergies and may cause lacrimation and breathing troubles in the future. There's no such risk with chalk markers. They are even non-toxic eliminating concerns about health hazards.

## 5. Richer Colors

Of course, chalks come in a variety of colours but the new chalk markers have the edge in that the colors are far more vibrant. This makes them far more appealing to children and the vibrancy of the colors will bring their creations to life.

Chalks pale in comparison to liquid chalk markers. Liquid chalk markers are safer, more fun to use, versatile and offers greater value for money. Crafts for Kidz offer one of the best selection of liquid chalk markers on the market today. Their chalk markers feature 8 vibrant colors which are non-toxic and odorless. They contain twice the ink of other liquid chalk markers and lasts a lot longer. For further information or to purchase Craft 4 Kidz liquid chalk markers, visit:
