

Vigilant Software launches new ISO 27001 Documentation Toolkit feature for vsRisk™

ELY , UNITED KINGDOM, August 5, 2015 /EINPresswire.com/ -- [Vigilant Software](#), the leader in information security compliance software, has launched a new feature that enables customers to purchase [vsRisk™](#) with a built-in documentation toolkit that provides the complete set of policies and procedures needed for compliance with ISO 27001:2013.

Customers that purchase the combo product will be able to select the relevant policies and procedures directly from the corresponding ISO 27001 controls in vsRisk, accelerating the implementation of security controls.

Customers who purchase vsRisk™ with the built-in documentation toolkit before the end of August will save 25% with the special launch offer. To find out more, visit: www.vigilantsoftware.co.uk.

vsRisk significantly reduces the time and money spent performing an information security risk assessment. The integrated, searchable databases of threats, vulnerabilities and risk scenarios make the risk assessment process simple and intuitive. vsRisk features a controls console that offers a quick view of the status of controls and actions planned, while producing a set of exportable, reusable and audit-ready reports.

View the full features of vsRisk on the developer's website at: www.vigilantsoftware.co.uk/t-howvsriskcanhelp.aspx.
