

# Universal Design Specialists Announces Introduction of Trench Drains on Best Bath Shower Pans

*Universal Design Specialists announced that trench drains are now available on several of their handicap walk in shower models in place of water stoppers.*

NAPA, CA, USA, August 5, 2015 /EINPresswire.com/ -- Universal Design Specialists announced that the option to include a trench drain system has recently been added to some of their [handicap showers](#). These may be viewed on their Internet Website at <http://www.universaldesignspecialists.com/walk-in-showers/>.

This new trench drain system is available for order immediately on their 60x36 barrier free [walk in showers](#) as well as the same size Designer series pan with a 3/8" recess in the floor to accommodate their customer's tile of choice. Other sizes such as their 60x34 Designer series and standard series will be available to order by the end of August and the 60x32 unit will be ready to go by the end of November this year. By the end of this year we will offer pans and complete showers in our three most popular sizes. These can all be combined with our recently launched subway tile walls resulting in a very modern looking shower unit.

The trench drain addition to their [handicap shower](#) stalls effectively eliminates the need to use the rubber water stopper more common with all their curb-free walk in shower units. Not only does this system and appropriate shower curtain eliminate the chance of water escaping from the bathing zone but it looks stylish and modern too. It's an option that is also more typically found on high-end stone and tile custom shower installations.

Further development now also offers the 60x36 unit in the Designer series pan where one can install their choice of tile into the floor to match their choice of tile on the wall surround. The net result is a very affordable handicap walk in shower designed to the personal taste of the owner while still offering the safety and accessibility of barrier free bathing.

Universal Design Specialists always includes Free Shipping in 48 States with all online orders. Considering the weight and size of a typical handicap shower, this represents a substantial savings for their customers. The combination of their aggressive discounted pricing for all online orders and Free Shipping, substantially reduces the overall cost of purchasing quality ADA showers from them.

Company President Marc Mendelsohn believes that this innovative addition to their offering of walk in showers will enhance the aesthetic appeal of their gel coat fiberglass handicapped showers.

The standard 30 year warranty included with all Best Bath showers is also part of this offering. We anticipate that this exciting new development will further enhance the appeal to our customer base of ready-made handicap shower stalls and walk in showers for seniors said Mendelsohn.
