

Gamma Knife Market: Brain Metastasis Segment to Expand at 9.2% CAGR through 2025

Gamma Knife market is expected to be amplified at a brisk pace through 2025, owing to its effectiveness in treating brain metastasis, cancer, trigeminal neuralgia

VALLEY COTTAGE, NEW YORK, UNITED STATES, August 17, 2015 /EINPresswire.com/ -- Future Market Insights (FMI), in its research report, titled, "[Gamma Knife](#) Market: Global Industry Analysis and Opportunity Assessment 2015-2025," provides key insights on the growing use of Gamma Knife in treating brain disorders and cancers.

Future Market Insights has segmented the global Gamma Knife market on the basis of disease indication into brain metastasis, cancer, arteriovenous malformation, trigeminal neuralgia, and others.

The brain metastasis segment accounted for 68.4% of the overall Gamma Knife market in 2014. According to FMI, this segment is anticipated to witness a compound annual growth rate (CAGR) of 9.2% during the forecast period 2015-2025 and reach a valuation of US\$ 285.7 Mn.

The use of Gamma Knife in treating cancer is gaining traction in the healthcare sector. Gamma Knife is non-invasive in nature, owing to which it is being widely used in treating elderly patients. The cancer segment accounted for 10.2% of the overall Gamma Market in 2014; FMI estimates it to hold a market share of 10.9% by the end of forecast period.

Gamma Knife is also being used to treat arteriovenous malformation (AVM), an abnormal connection between veins and arteries. AVM is usually congenital and currently not much information is available on the genetic transmission patterns of AVM. According to FMI's research, the arteriovenous segment of the Gamma Knife market is expected to amplify at a CAGR of 7.6% during the period 2015-2025.

Use of Gamma Knife in treating Trigeminal neuralgia, also known as prosopalgia, is also gaining acceptability in the healthcare sector. According to FMI, this segment of Gamma Knife market is projected to expand at a CAGR of 7% during the forecast period and reach a valuation of US\$ 32.9 Mn by 2025.

FMI's research report has also segmented the Gamma Knife market on the basis of anatomy. The segments on the basis of anatomy include head, neck, and other body parts. Among these, use of

Gamma Knife treatment is predominant in treating disorders of the head.

The head segment accounted for a share of 88.1% in 2014; FMI expects this segment to amplify at a CAGR of 9.2% during the forecast period and reach a valuation of US\$ 364.8 Mn.
