# Haypi Kingdom: The Return of the King 1.1.0 is Hot in the AppStore

*Haypi Co., Ltd. has released a major update including newly added contents, adjustments and smart optimizations*

SHANGHAI, SHANGHAI, CHINA, September 1, 2015 /EINPresswire.com/ -- Haypi Co., Ltd. has released a major update of their latest hit - Haypi Kingdom: The Return of the King. The new patch version is 1.1.0, and it comes with newly added contents, adjustments and smart optimizations. The creative developer Haypi very often releases updates, but this big update does make a difference, and really pleases the fans.
In Haypi Kingdom: The Return of the King 1.1.0, the loyal users feel happy with the big changes. Haypi now takes great care of the old players. In their honor, the buildings in the home city can be upgraded up to Lv.25. Many sciences in the College can also be developed to Lv.25, which gives significant advantage for the biggest fans.  The choice of Sciences in the College has been enriched with new Sciences, including Defense facilities and Healing. Another leap forward is the great new graphics of the World Map. They really look like real, and take players to the magic Haypi world, with a
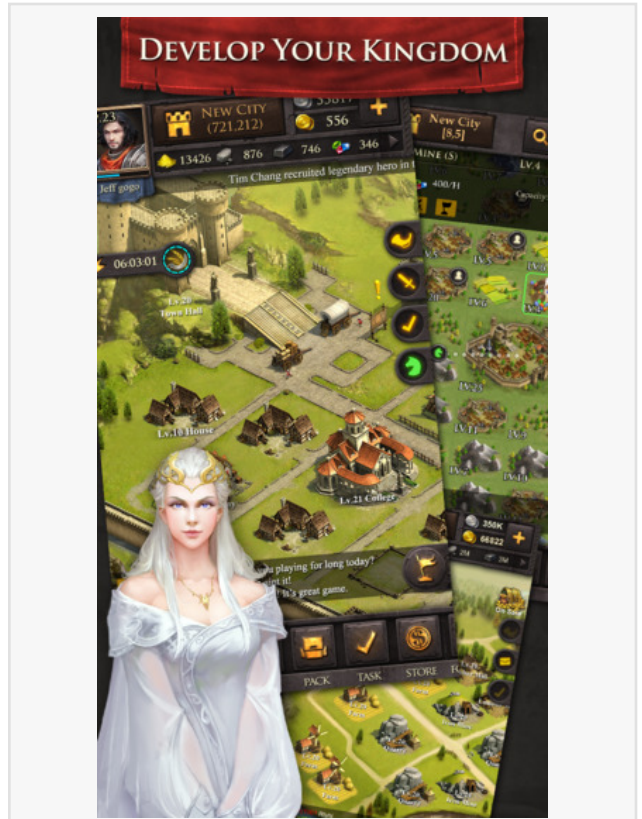

bit of Middle Age flavor.
Haypi has also done a lot of feature adjustments.  The new version allows for a better organized way of city defense.  Directly through the Defense option, players can choose not to attack when plundered. These common tactics replace the separate plunder defense and attack defense settings. In addition,  Marching Speed-up is modified to reflect a decrease in the percentage of marching time, instead of reflecting a number of minutes. Generally, there is a better coordination of Marching speed.

In Haypi Kingdom: The Return of the King 1.1.0, there is also a better coordination of functions. For example, during war, no armies can leave the city, etc.  Now the estimations in battles are done better, so that the attacker will loose less troops, while the defender will suffer bigger losses of soldiers. To ensure better fairplay, the Sorcerers' damage to Royal Knights and Hoplites are weakened, so these type of soldiers can improve their significance in the game. After the enemy's city has been captured, the enemy soldiers can be massacred. The loyalty of the city determines the army counts. In order to prevent such massacres, the enemy  can use the newly added  Royal Spot function. Players now can dispatch their soldiers to a special spot, where they can escape from massacres.  Resurrection rate and attack difficulty in royal spot is decreased. The Resurrection function of the plundered towns has also been optimized.  The developer Haypi has further improved the fairness of the game. To begin with, for a fun gameplay, now it is also possible to protect some resources. The Ressource Lock Function is added. (Through this function, some of the defender's

resources will be locked when the attacker's troops are no less than 1/5 of his and also the marching time is less than 30 minutes.)  Besides, defense minister can contribute and boost the city defense.

Haypi really loves their fans. Players are happy, and Haypi is glad to share the joy from the new big update of  Haypi Kingdom: The Return of the King. The Haypi Community is together again, united through this amazing game.   It is actually the new brother game of Haypi's signature game Haypi Kingdom. Anyone who liked Haypi Kingdom, will just love Haypi Kingdom: The Return of the King 1.1.0！   This fascinating iOS MMO is available for free download from the AppStore.
