

Global Vision to Spotlight Intelligent Proofreading at Packaging Innovations 2015

ArtProof and ScanProof help ensure accuracy from artwork to print for brand companies

MONTREAL, QUEBEC, CANADA, September 3, 2015 /EINPresswire.com/ -- [Global Vision](#), the world leader in the development of innovative proofreading technologies, today announced that it will be spotlighting its award-winning print and artwork inspection solutions, [ScanProof](#) and [ArtProof](#) at Packaging Innovations 2015.

Join the Global Vision team September 16 and 17 at the Olympia London, booth #F33

Be the first to get a sneak peek of Intelligent Proofreading
Global Vision's Intelligent Proofreading technologies help to eliminate false positives by more than 50% by applying logic to identify different elements of the artwork including: text, artwork, barcode, Braille, background and dielines.

ArtProof is the world's first 64-bit artwork inspection solution for Mac and Windows environments.

Developed for printer, pre-press and graphics industry users, ArtProof inspects artwork with pixel precision, dramatically increasing packaging accuracy while reducing inspection times.

ScanProof is designed with enhancements that will dramatically ease the challenges that professionals face on

a daily basis, ScanProof features new unified artwork, barcode and Braille QC that will enable users to directly integrate Braille and barcode verifications within inspections thereby saving valuable time and improving productivity.

GLOBAL VISION

ArtProof Artwork Inspection Solution

ScanProof - Print Inspection Solution

“The new versions of ArtProof and ScanProof represents a

development working closely with our customers, addressing their specific needs for their ever changing global markets,” explained Reuben Malz, President of Global Vision. “We are delighted to demonstrate, for the first time, these industry leading inspection solutions at Packaging Innovation 2015.”

Leader in proofreading technologies for 25 years
