

QuickerTek Creates Four New USB-C Products Compatible with 2015 12-Inch MacBook

WICHITA , KANSAS, UNITED STATES, September 1, 2015 /EINPresswire.com/ -- QuickerTek, the technology leader in mobile power and wireless networking products for Apple computers, announces a complete new line of products, all designed specifically to enable the 2015 12-Inch MacBook with new capabilities. This model's minimalist design only includes one Type-C USB port which is restricted in its variety of compatible products. QuickerTek has succeeded in solving this problem, creating four new products to provide the 2015 MacBook user with all they need for convenient charging and power. These include the CJuicz USB Expander, Cigarette Lighter Charger, External Battery and Solar Panel Charger.

The Solar Panel Charger is a solar panel which powers the MacBook battery for use even while charging the internal battery. Other photovoltaic products can't offer this same advanced capability. Even when the MacBook battery is completely dead, the QuickerTek solar panel charges and powers the laptop simultaneously. It is also made with thin film photovoltaic creating a lightweight, foldable design. At only a hair over 11 inches x 6.5 inches folded, and at only 1.3 pounds, it is light and mobile user ready, and it is powerful enough to charge the MacBook as quickly as an Apple AC charger, minimizing downtime.

The External Battery is the only product of its kind, featuring the USB 3.1 adaptor cable necessary to power and charge the 2015 12-Inch MacBook. This battery's base unit charges the computer for 8 extra hours of run time, utilizing the highest charge density of Li-Ion polymer batteries available. It also features a light weight 3D case, allowing QuickerTek to custom build the battery in any size. PCM and Smart Charging protection is included in the design so cells will not overheat, over or under charge. Another exciting feature of this battery is the way in which the user can check its charge status. Instead of LED indicators, this battery includes a button which can be pushed by the user, and the battery will send a message via Bluetooth 4.0 LE to their iPhone, iPad or MacBook displaying the charge status.

The USB Expander is a USB hub which plugs into the 2015 MacBook's Type-C connector to expand it to four USB 2.0 and 3.0 ports. It allows the user to sync and charge their iPhone, iPad and most, if not all, USB devices to their 2015 MacBook. With this product, a user of the 2015 12-inch MacBook has plenty of available USB slots and is able to connect their other Apple products with their computer.

The Cigarette Lighter Charger is an automotive and airline type cigarette adaptor which powers and charges the 2015 MacBook with a Type-C USB connector. It is an auto-polarity adaptor, meaning fully reversible and can charge the MacBook as quickly as Apple's 30 Watt OEM charger. It also features a filtered and fused four foot cable for plenty of room to move and an LED indicator.

30 Watt 2015 Type-C MacBook Solar Panel Features:

- * Compliant with USB Type-C 12-inch MacBook
- * Charges and powers simultaneously
- * Foldable and lightweight solar panel
- * Charges the MacBook as fast as an Apple AC charger

Solar Panel Specifications:

- * Dimensions Folded: 11 1/32 inches x 6.5 inches [280mm x 165mm]
- * Dimensions Unfolded: 30 inches x 31 11/16 inches [762mm x 805mm]
- * Weight: 1.3 pound

2015 Type-C MacBook External Battery Features:

- * Increases 2015 MacBook's run time by 8 hours
- * Utilizes the highest charge density Li-Ion polymer batteries available
- * Battery charge status via Bluetooth 4.0 LE to iPhone, iPad or MacBook
- * Custom 3D printed case
- * Can be recharged via Apple's OEM charger or included 120/240vac smart charger
- * PCM and Smart Charging in design so cells will not overheat or over/under charge
- * Can be recharged via the 30 Watt 2015 Type-C MacBook Solar Panel from QuickerTek
- * Includes the standard USB Type-C (3.1) connector cable

Specifications:

- * Weight (Base Unit): 0.9 lb.
- * Dimensions: 3/4" x 3 7/8" x 5"

USB Type-C USB Expander Features

- * Plugs into 2015 MacBook's Type-C connector to expand to four USB 2.0/3.0 ports
- * Allows user to charge and sync iPhone, iPad and most, if not all, USB devices
- * Includes a four port USB 2.0/3.0 to USB Type-C connector
- * Includes an external wall power supply

USB Type-C Cigarette Lighter Charger Features

- * Automotive/airline cigarette lighter adaptor
- * Type-C fully reversible charger for 2015 MacBook
- * Charges at same rate as Apple's 30 Watt OEM charger
- * Filtered and fused four foot cable
- * LED indicator
- * Voltage range of 11.5 to 16.5 Vdc
