Growth of the global General Anaesthesia Drugs market is primarily driven by increasing incidence of surgeries related to cardiovascular diseases, accidents, craniomaxillofacial deformities, chronic respiratory disease, and joint replacement surgeries, especially among the geriatric population. Other trends driving market growth include strategic alliances among key players in the market, manufacturers eyeing intravenous general anaesthesia drugs market share, and expansion of healthcare sector in developing countries due to growing investments by major players. In addition, surge in demand for general anaesthesia drugs in all major and moderate surgeries owing to increasing health awareness and growing disposable income is projected to result in increased spending on general anaesthesia drugs. This in turn, is expected to bolster general anaesthesia drugs market growth during the forecast period (2015–2025).
