"The ITpreneurs ITIL Practitioner courseware is designed to engage learners from the first minute of the course and challenge them to adopt and adapt ITIL at a practitioner level," says Arjan Woertman, VP R&D ITpreneurs. "How? There is no standard 'welcome to the course', from the moment the learners take part in the course they are challenged to work with peers on exciting cases."

"You have to know your co-learners to come up with the solution. Further, with video-based case study guidance, the

instructor will facilitate a highly interactive and intense 2-day course. Learners will be prepared for the AXELOS ITIL Practitioner Exam and will have the tools and skills required to start their own service improvement initiative on the workplace."
