

Haypi Kingdom: The Return of the King Version 1.1.1: Defend Your Lands in Alliance

Allies Act in Mutual Support through Embassies in the newly updated Haypi game

SHANGHAI, SHANGHAI, CHINA, September 28, 2015 /EINPresswire.com/ -- All Haypi games are known among players as super enjoyable, challenging and balanced games. This good reputation is stable due to the noticeable care, with which the programming teams carry out the development of each game. Constant updates ensure that the players are entertained and cared for. The continuous polishing provides for the fairness of the gameplay.

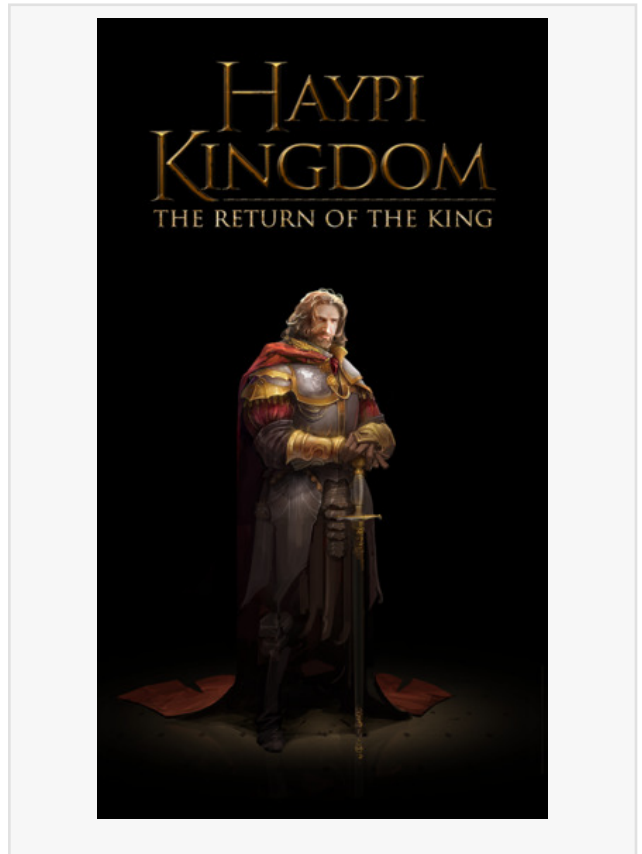

Now further optimizations contribute to the fun with the last update of Haypi Kingdom: [The Return of the King](#). The 1.1.1 patch has just hit the AppStore! The mobile game is a great MMO, a brother version of Haypi's emblematic superhit Haypi Kingdom.

In the new 1.1.1 version of Haypi Kingdom: The Return of the King, there is a new way of mutual protection among Alliance members. A new building "Embassy" can be built in Home City and all players are

recommended to build it. When enemy's troops are on their way, the attacked players can tap on the Embassy to send a request for help from other members. All players in the Alliance will see the call for help in their Embassies. So they will decide whether they can send troops through their own Embassies to go and help the city in need. All troops sent by all helpful members will go to the raided city to protect it. This is Haypi's great innovative way of player interaction. It is fun, and encourages more communication and actual help within the Allies. All Haypi games have always offered ways to interact in individual level, Alliance level and World Level. That's why the game Haypi Kingdom: The Return of the King is so much fun! It actually offers a platform for communication and mutual support!

Now Haypi Kingdom: The Return of the King 1.1.1 also offers a new fun activity for the members within an Alliance. In the new version, the Alliance leader or Vice Leader can activate a "Guard Your City" Activity, which puts all allies in defense from an automatic AI attack. The troops altogether will protect the whole alliance against the raid. At the end, everyone will get rewards. This is a great activity because it can further befriend the players in the Haypi [community](#). Alliances form real friendships!

Haypi Kingdom: The Return of the King is even better and more intriguing than before. New features and optimizations have been made, and the game is more mature now. To name a few, in the College building, now players can develop a new technology "Marching to Oasis". It can significantly reduce

the time for the troops to reach an Oasis. Apart from that, the game encourages the use of the latest game feature - Royal Spot. For further support of players using the feature, there has been a decrease in the army's crop consumption in Royal Spot. Thus, players can freely enjoy this feature and its benefits. Besides, the anti-scouting feature is much supported, too. For example, in the new version of the game, when the defender uses anti-scouting, and the attacker's troops counts is less than one tenth of the defender's, The Attacker won't get the troops info of the defender in scout report. Last, but not least, further optimizations and polishing has made the game even smoother.

[Haypi Co., Ltd.](#) provides endless fun for players from all walks of life. The creative developer has released quite a few great hits among the MMOs. Haypi Kingdom: The Return of the King has turned into an emblematic game of the successful developer. The millions of downloads continue to prove the great quality of the game. The iOS hit is free to download from the AppStore. Everyone is welcome to join the Haypi Community of Fun!
