

Quantum Innovations Inc. Announces Successful Achievement of Meaningful Use Phase 2 Certification

Grace Century has reported the attainment of Meaningful Use Stage 2 (MU-2) certification for Quantum Innovations, its electronic medical records project partner

RAS AL KHAIMAH, RAS AL KHAIMAH, UNITED ARAB EMIRATES, September 30, 2015 /EINPresswire.com/ -- [Grace Century](#)'s Electronic Medical Records (EHR) project partner [Quantum Innovations](#) Inc. has achieved the much-sought after Meaningful Use Stage 2 (MU-2) accreditation for its Personal Wellness electronic Records (PWeR) product. This major achievement goes hand-in-hand with a significant upgrade of the product platform, with the new version designated as PWeR® 3.0.

The formal MU-2 certification received by PWeR® 3.0 was awarded by InfoGard Laboratories Inc. which is authorized by the Office of the National Coordinator for Health Information Technology (ONC). This means that PWeR® 3.0 now belongs to an elite group of product innovations which meet the demanding standards set by the U.S. Secretary of Health and Human Services for the Center for Medicare and Medicaid Services (CMS). It is estimated that the overwhelming majority of applications for MU-2 certification fail due to the stringent selection criteria, making the achievement even more notable.

Noel J. Guillama, Chairman of Quantum Innovations, stated, "Through over a decade of dedication and expertise, our team's herculean tenacity has yielded a very positive result with this most complex and elite global health information technology certification. It has been an extraordinary effort, involving international, multi-disciplinary collaboration, in successfully gaining MU-2 certification and bringing PWeR 3.0 to market. We intend for PWeR 3.0 to be used, both in the U.S. as well as in other countries and regions, to help transform the \$7 trillion (USD) spent on global healthcare consuming over 10% of global GDP."

Grace Century CEO [Scott Wolf](#) comments "We are thrilled to have our project reach this milestone. Quantum has worked extremely hard on this and we are confident that attaining MU-2 accreditation will be the catalyst for the company to be a major transformer of the healthcare information sector."

The MU-2 accreditation also means that PWeR 3.0 will be one of a select group certified to assist eligible providers and hospitals to tap into the estimated \$36.5 billion fund provided by The American Recovery and Reinvestment Act (ARRA) and the Health Information Technology Economic and Clinical Act (HITECH Act.) to support EHR adoption and build national exchanges of medical information.

In addition, MU-2 certification EHR has become mandatory under the U.S. Health and Human Services Department to avoid annual Government-imposed penalty payments. EHR is estimated to represent 1% of all Government-imposed penalty payments in 2015 (over \$1 trillion gross annually in USD) and could rise to as high as 5% by 2018.
