

# Vapour Organic Beauty Products Arrive At Hinsdale's Clementine Beauty On October 1

*The skin care and cosmetics boutique in Hinsdale is giving away a free Vapour Elixir lip gloss with Vapour product purchase during Breast Cancer Awareness Month*

HINSDALE, IL, USA, September 30, 2015 /EINPresswire.com/ -- [Clementine Beauty](#), a skin care and cosmetics store in Hinsdale, IL, has announced an expansion of their product line. The company will start selling Vapour Organic Beauty products online and in the store's retail location starting October 1, 2015.

Vapour Organic Beauty products are 100% organic made with pure minerals, essential oils and organic plant ingredients. The line includes both makeup and skincare products that contain no carcinogens, endocrine disruptors or toxic chemicals. None of the products are petroleum-based or contain chemicals or nano particles.

"We are super excited to start carrying this line. We love the concept behind Vapour Organic Beauty of creating healthy products that perform well and are manufactured in a sustainable way. These are among the healthiest, most ethically-produced skincare and makeup products on the market today and we are absolutely certain that our customers will love them as much as we do," explained [Betsy Peake](#), Owner of Clementine Beauty ([www.clementinebeauty.com](http://www.clementinebeauty.com)).

To celebrate its new addition to the product line, Clementine Beauty is giving away a free Vapour Elixir lip gloss to customers during the month of October. Peake also noted that she will be donating 100% of their Vapour Organic Beauty product sales during the month to cancer research.

"Donating to cancer research is the perfect way to celebrate the addition of Vapour products to our shop. The chemicals in makeup and body products can be absorbed directly into the skin, which could put people at risk for developing various types of cancers. Vapour is at the complete other end of the spectrum. The company goes to great lengths to develop natural, healthy, chemical-free products that are not harmful to our bodies. They've proven that it is possible to have high-performing cosmetics and skincare products that are free of chemicals," said Peake.

Vapour has attained the "Champion" safety status from the Environmental Working Group and the Campaign for Safe Cosmetics. The company is also a member of the Leaping Bunny Program, an international organization that promotes cruelty-free product development. Three Vapour products have already earned the USDA Certified Organic label and all products are made in the U.S.A.

The company puts plenty of thought into its packaging too, using only recycled and recyclable packaging. Waste reduction efforts have even gone into product application; Vapour products can be applied directly from the stick. This reduces the need for additional cosmetics tools and produces less waste.
