

# Documentation templates developed by a PCI QSA helps organisations achieve PCI DSS 3.1 compliance

*ITGP has updated its PCI DSS Documentation Toolkit to meet the requirements of PCI DSS v3.1.*

ELY, ENGLAND, October 7, 2015 /EINPresswire.com/ -- ITGP has updated its [PCI DSS Documentation Toolkit](#) to meet the requirements of PCI DSS v3.1.

Containing expert guidance and advice, the PCI DSS Documentation Toolkit has been designed, developed and updated by a PCI QSA (Qualified Security Assessor) to support payment card-accepting organisations ('merchants') by ensuring that their documentation is compliant with the latest version of the PCI DSS.

Available for immediate download, this toolkit contains updated project tools that will accelerate any PCI DSS compliance project:

- A Documentation Analysis Tool that helps you to ensure that all required documentation is in place
- A Gap Analysis Tool that allows you to check your organisation's progress towards achieving compliance
- A PCI DSS v3.1 and ISO 27001:2013 Mapping Tool, giving you all the technical information you need to integrate your PCI DSS project with an ISO 27001-compliant information security management system.

Embed the documentation into your organisation with new functionality making styling, formatting and branding your templates a quick and easy task.

Supporting your compliance project, this toolkit includes expert and professional guidance on scoping and encryption key management as well as three months' access to two PCI DSS staff awareness eLearning licenses.

For more information on the PCI DSS Documentation Toolkit, visit IT Governance's [webshop](#).
