

German Army, Turkish and Polish Air Force, Swedish Armed Forces, NATO present at Joint Forces Simulation & Training 2016

SMI's highly anticipated 7th annual Joint Forces Simulation & Training conference returns to London in February.

LONDON, UNITED KINGDOM, October 7, 2015 /EINPresswire.com/ -- This unique event brings together world's leading Simulation, Training and Modelling representatives allowing the delegates to learn the A-Z journey of key drivers impacting joint forces training.

Faced with military budget cuts and fluctuating energy prices the global military simulation and virtual training market is in an excellent position for growth as the demand for more cost effective, cohesive training systems across militaries increases. With the thinking that the military will probably have to cut back on live field exercises and increasingly rely on computer-based war gaming and training programmes to

combat rapidly evolving threats, these projections create lucrative opportunities for the industry.
