

Electrical Substation Development conference to include speakers from DEWA, SEC, PDO and many more

Key stakeholders involved in developing new and existing substations will discuss the latest trends in designing, constructing and commissioning substations.

DUBAI, UNITED ARAB EMIRATES, October 14, 2015 /EINPresswire.com/ -- For Immediate Release:

Power companies in the Middle East are upgrading their infrastructure capacity by developing new substations. They are also improving the performance of their existing substations by increasing network capacity and introducing innovative technologies that will reduce operational costs and increase plant productivity.

The Electrical Substation Development conference will bring together key stakeholders involved in developing new and existing substations to discuss the latest trends in designing, constructing and commissioning substations. Gain insight from case studies and teachings adopted from project experience and research to improve designs, simplify construction and reduce costs for substation development.
