

Integrity Life Sciences Continues Expansion in the Middle East Gulf Region

TAMPA, FLORIDA, USA, October 16, 2015 /EINPresswire.com/ -- President and CEO of Integrity Life Sciences, James Gibson, confirmed further expansion in the Gulf Coast region with the most recent installation of the Integrity Spinal Care System (ISCS) in the country of Qatar. This installation validates the need and desire for alternative, non-invasive treatment options for chronic low back pain sufferers.

“The increased interest in Integrity’s Non-Surgical Spinal Decompression systems is not surprising when you look at the international data regarding low back pain,” commented Jim Gibson. “In fact, a 2014 study published in the Annals of the Rheumatic Diseases, shows that low back pain causes more disability than nearly 300 other conditions worldwide - and nearly one in 10 people across the globe suffers from an aching lower back.” The study further reflects that back pain also varied significantly by geographic area. Prevalence was highest in Western Europe followed by North Africa/Middle East.

Gibson continued, “By participating in major industry showcases like Arab Health in Dubai and the Medica Trade Fair in Germany, our goal is to be a global educator and resource regarding non-invasive treatment options for back pain sufferers around the world.” Integrity’s systems are currently being used to treat patients in North America, South America, India, Russia, Europe and the Middle East.

Integrity Life Sciences delivers a multitude of orthotic treatment options to address one of the most costly systemic ailments in the world, chronic low back and neck pain. The advanced solution begins with the Integrity Spinal Care System. Integrity’s medical devices are non-surgical spinal decompression therapy systems engineered to provide pain relief for compressive and degenerative conditions of the spine. Specifically, conditions that may be treated include: neck pain and back pain associated with herniated discs, protruding discs, degenerative disc disease, posterior facet syndrome, and sciatica. It achieves these effects through decompression of intervertebral discs, that is, unloading due to distraction and positioning.

Team Integrity is guided by the leadership of Mr. James Gibson and a staff of managers, engineers, technicians, quality and regulatory approval professionals with a cumulative 50 plus year track record in the health care industry with specific demonstrated success in the global Non Surgical Spinal Decompression Industry. Integrity Life Sciences manufactures its products with quality and safety standards as demonstrated by its ISO 13485 registered quality system with TUV, SUD and the CE mark affixed to its product. Our FDA clearance together with compliance to global harmonized

standards of both Mark CE and ISO 13485 allows Integrity Life Sciences to distribute to countries all over the world. As the owner of multiple US Patents, Integrity Life Sciences is committed to ongoing research and development in support of the worldwide healthcare community.

Prior to Integrity Life Sciences, Mr. Gibson founded Axiom Worldwide, Inc in 2001 and obtained multiple US FDA 510(k) clearances over the years. Axiom invented its flagship products, the DRX9000 True Non-surgical Spinal Decompression System and the DRX9000C, for use in medical markets around the globe. The DRX 9000 and the DRX9000 C were created to provide relief of back and neck pain and symptoms associated with herniated discs, bulging or protruding intervertebral discs, degenerative disc disease, posterior facet syndrome, and sciatica. The dedicated team at Integrity Life Sciences will continue to support legacy devices while pursuing continued medical innovations throughout the world.

Integrity Life Sciences is a privately held USA based company with international partners located across the globe with a mission of "Restoring Integrity to the Spine".
