

# Global Vision to Present Latest Advanced Proofreading Technologies at Pharmaceutical and Medical Device Labelling Summit

*Proofware and ScanProof the choice for pharmaceutical and medical device companies worldwide*

MONTREAL, QUEBEC, CANADA, October 26, 2015 /EINPresswire.com/ -- [Global Vision](#), the world leader in the development of innovative proofreading technologies, today announced that it will be spotlighting its award-winning print and web-based inspection solutions, [ScanProof](#) and [Proofware](#) at the Pharmaceutical and Medical Device Labelling Summit, October 27 to 29 at the Maritim proArte Hotel Berlin, Germany, booth #4

Join the Global Vision team for this interactive presentation that will help you optimise your labelling strategies: Challenges and Technologies for Label & Packaging Quality Control  
Time: Wednesday October 28, 2:15pm

- Understanding Quality Control challenges in the labelling process
- Find out about unique end-to-end processes & technologies to help reduce errors in labelling from text verification, artwork and print inspection.

Be the first to get a sneak peek of Intelligent Proofreading

Global Vision's Intelligent Proofreading technologies help to eliminate false positives by more than 50% by applying logic to identify different elements of the artwork including: text, artwork, barcode, Braille, background and dielines.

ScanProof is designed with enhancements that will dramatically ease the challenges that professionals face on a daily basis. ScanProof now features new unified artwork, barcode and Braille QC that will enable users to directly integrate Braille and barcode verifications within inspections thereby saving valuable time and improving productivity.

The advertisement for Global Vision's Proofware Packaging Inspection Suite features a central image of two medicine bottles with various inspection annotations. On the left, a vertical list of inspection types is shown with corresponding icons: Artwork Inspection (orange), Annotate & Collaborate (yellow), Braille Inspection (blue), Multi-language Spell-check (red), Text Inspection (green), and Barcode Inspection (yellow). Dotted lines connect these icons to specific areas on the bottles. Annotations include 'Color differences' (red boxes on bottle caps), 'Broken text' (red boxes around the word 'text'), 'Braille Inspection' (red boxes around Braille characters), 'Multi-language Spell-check' (red boxes around Chinese characters '破碎的文字'), 'Text Inspection' (red boxes around 'Dropped, moved or added text'), and 'Barcode Inspection' (red boxes around barcodes). The background is a light blue sky with clouds. At the top, the 'GLOBAL VISION' logo is displayed. At the bottom, the website 'www.globalvisioninc.com' and email 'info@globalvisioninc.com' are provided.

Proofware is the world's first true, all-in-one web-based packaging inspection suite, providing enterprise-wide instant access to everyone involved in the security of their brand copy and artwork. Proofware offers a variety of cloud-based applications to seamlessly verify digital files throughout the workflow process, catching any undetected errors before it's too late.

#### Available Proofware Apps

- DocuProof – Text inspection
- ArtProof – Artwork inspection
- SpellProof – Multi-language spell check
- BrailleProof – Braille translation
- BarProof – Barcode verification
- Notes – Annotation

ScanProof - Print Inspection Solution

“In the highly regulated pharmaceutical and medical device market places anything less than 100% accuracy is not acceptable,” explained Reuben Malz, President of Global Vision. “We have created our technologies working closely with the world’s leading pharmaceutical and medical device companies, with a goal to ensure; No Errors, No Reprints, No Recalls.”

We have created our proofreading technologies working closely with the world’s leading pharmaceutical and medical device companies, with a goal to ensure; No Errors, No Reprints, No Recalls

#### About Global Vision

Global Vision is the world leader in the design and delivery of Innovative Proofreading Technologies. Our solutions are widely interoperable and have been integrated into the packaging workflows of leading consumer packaged goods companies, printing firms and over 72% of the major pharmaceutical companies worldwide.

Global Vision’s complete suite of advanced solutions featuring text-based, pixel-based and Braille inspection technologies, are designed to eliminate printed artwork and copy related errors, providing end-to-end security at every stage of the packaging workflow. All our proofreading solutions meet FDA 21 CFR Part 11 / EMA Annex 11 requirements.

Headquartered in Montreal, Canada, Global Vision has worldwide representation. For more information, please visit [www.GlobalVisionInc.com](http://www.GlobalVisionInc.com)
