

Rock The Goat Game - Out now on iOS and Android

Barry was born to balance! Help him unlock his alter egos and their exotic locations, in a new arcade game - Rock The Goat, that's free to play!

LONDON, UK, October 26, 2015 /EINPresswire.com/ -- [Rock The Goat](#) is a game which sees you balance Barry the Goat on a wobbly arc, for as long as possible. As you collect coins, you'll reveal Barry's vast wardrobe of costumes (because goats love to dress up) along with his unique hand-drawn locations to play in.

Rock The Goat on [iOS](#) and [Android](#) is a debut for the developers Galaxy Crunch, a London-based team consisting of Harry Lynn-Evans and his best buddy Joe Mortimer. The game uses the F.A.R.M (Fun And Realistic Motion) system built by Metacoded, drawing inspiration from games which use a responsive balancing mechanic, particularly that of the Tony Hawk's Pro Skater franchise. It's led to Rock The Goat having totally unique gameplay that's easy to pick up, but kinda hard to master.

The visuals were hand-drawn in order to match the wobbly and light feel of the gameplay, opting for a two-tone and bright 2D style. Each costume and background location are completely different, which adds to the game's personality and gives the players something really exciting to unlock. The composer Joss Campbell was brought in to create the instantly catchy and fun theme song, inspired by 90's cartoons. Pekingese Publishing liked the mechanics of the game and offered to produce and publish it.

It's a light hearted, casual mobile game with an original look and feel that's been designed to make you laugh! Hopefully everyone will enjoy playing it and discovering Barry's world!

Team

Developed by Galaxy Crunch - Harry Lynn-Evans & Joe Mortimer

Built by Metacoded

Sound by Joss Campbell

Published and Produced by Pekingese Publishing.
