

OnPage Helps Midwives Use the Latest Technology for Reliable, Critical Communication.

The OnPage Priority Secure Messaging System has been Universally Adopted by Midwives throughout the Northeast and Canada

WALTHAM, MA, UNITED STATES, October 26, 2015 /EINPresswire.com/ -- OnPage announced today the continued widespread acceptance and implementation of its industry leading priority alerts system by Midwife professionals.

Real-time, secure communications between Midwives and their clients play a crucial role in pre-natal care, a mother's peace of mind and the critical alerts leading up to child birth.

The following is what Midwives had to say about using the OnPage [Alert Management System](#):

Practice Administrator, Esraa Dhaif

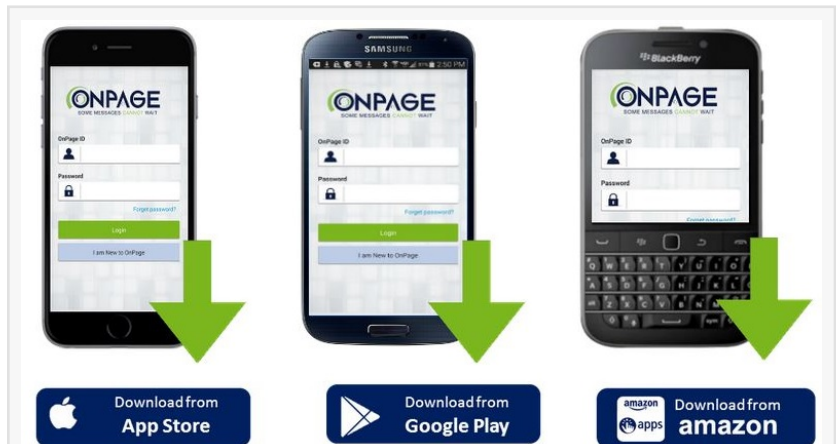

Esraa Manages thirteen Midwives with OnPage On-Call Scheduling and Failover system. She oversees the entire midwife team with the OnPage enterprise

dashboard at the always busy Midwifery Collective of Ottawa.

Several clients are being juggled at the clinic weekly, and each one needs to be assured of instant communication with their midwife 24/7. If a client is having issues with their pregnancy or going into labor, OnPage priority messaging gets through to a midwife who can assist them immediately.

Midwifery Collective of Ottawa's clients email the page/alert or call the OnPage toll free number with their midwife's OnPage ID. They have an escalation policy in place that guarantees an alert will get through at any time of the day or night.

We spoke to Esraa Dhaif about the critical communication challenges that she faces on a daily basis. The following interview details the day-to-day experiences of a practice administrator using OnPage, while managing a group of midwives.

Midwives Choose OnPage for Reliable, Critical Communications!

OnPage: “How did you hear about us?”

Esraa Dhaif: “An Ottawa hospital that is using OnPage recommended that we try it out. We downloaded the Free Trial and experienced the system first hand. After additional research and experimentation we decided OnPage was what we were looking for.”

OnPage: “Tell us why priority alerts are important to your business.”

Esraa Dhaif: “Our clients never have to wait to hear back from one of our Midwives. There is an escalation list of the on-call midwives entered in the enterprise dashboard, so we are confident that every client will hear from someone right away. No matter who is

off that day, OnPage goes straight down the list of names available until someone gets the page and responds.

We use the OnPage messaging system every day, 24/7, and it has made our job easier and less stressful. The midwives like the fact that all the paging is on their phones and they don't have to carry another device. Their old style pagers were unreliable and not getting the job done. They were happy to stop using them and update to the latest messaging technology.”

“

OnPage is Proud to be the Priority Alert Leader in the Midwifery Community! We are committed to providing the most advanced secure communication systems for the healthcare industry.

Judit Sharon

Cheryl Anderson Heitkamp. Cheryl belongs to an active midwives group that attempted to use Google Voice phones for messaging and it didn't work out at all.

OnPage: “How would you characterize your day to day operation?”

Cheryl Heitkamp: “Midwives have unpredictable schedules. We needed a system like OnPage to make sure our messages were getting to the right person every time. Our clients are confident that they can get in touch with us quickly which is a big bonus. The hospital that we are involved with can connect with us directly using OnPage without any monitoring, once it was set up.

OnPage: “What did you like about our product?”

We needed a smartphone based app with a loud can't miss alert. We also required the priority messaging system to be easy to deploy. OnPage was completely compatible with every specification and feature we needed. Besides the real-time alerting and on-call scheduling features, we are now HIPAA messaging compliant. HIPAA compliance was a must and OnPage provided that.

OnPage: “How did the application make your job easier?”

ONPAGE
SOME MESSAGES CANNOT WAIT

Paging + Secure Messaging

- ✓ Continuous Prominent Alert
- ✓ HIPAA Compliant
- ✓ Audit Trial
- ✓ Escalation
- ✓ Scheduling

OnPage HIPAA Compliant Secure Messaging & Pager System

OnPage is involved every time we communicate with the Hospital and it's also the preferred way we can communicate reliably with each other. OnPage has the alert sound that always gets through. We are very satisfied with OnPage. We are using it daily and it works every time. It's made a big difference!

About OnPage:

OnPage is the industry leading Smartphone application system for Global, High-Priority, Real-Time Enterprise Messaging, Cybersecurity Intrusion Compliance and IT Alert Management. The OnPage application addresses the need for critical and time-sensitive messages.

OnPage takes mobile communications to the next level with the latest all-in-one-app features, including the ability to set priority level for each message to ensure the High-Priority messages receive immediate attention. Additionally, the new web based On-Call scheduling management tool with failover, enables enterprise users to plan ahead and route prioritized messages to the right person, on the right day, at the right time.

Thousands of IT Professionals, healthcare providers, doctors, field engineers, law enforcement, nurses, emergency responders and disaster recovery teams depend on OnPage rock solid reliability every day.

Leading corporations, including Blue Chip organizations have adopted OnPage for critical alerts and secure messaging.
