

# IT Governance puts spotlight on cybersecurity with special offers for Black November

BOISE, IDAHO, USA, November 4, 2015 /EINPresswire.com/ -- [IT Governance](#), North America's leading provider of cybersecurity consultancy, training, and documentation toolkits has announced its exclusive Black November offers, which give customers a free bestselling book or online course when purchasing one of its popular cybersecurity toolkits or training courses.

The offer coincides with this week's announcement that the Senate has approved the Cybersecurity Information Sharing Act, which encourages private companies to voluntarily share cyber threat information with the federal government and one another.

Alan Calder, the founder and executive chairman of IT Governance, says, "As the spate of cyber attacks in the United States escalates, organizations need to seek practical solutions that can help them resist the continued onslaught by cyber criminals. ISO 27001, the international standard for information security, has been proven to help prevent data breaches by promoting the implementation and management of a holistic approach to information security." American organizations looking to improve their cybersecurity posture should take advantage of these exclusive offers, available during November only.

## Cybersecurity documentation toolkits
