

# EaseUS Backup Software Newly Supports Cloud Backup

*EaseUS updates its backup software to offer an easy and efficient way to backup data to cloud storage Servers including Google Drive, Dropbox and OneDrive.*

NEW YORK, NY, USA, November 11, 2015

/EINPresswire.com/ -- EaseUS Software, a software company specialized in data backup, data recovery and storage management, recently released its newly-updated backup software, [EaseUS Todo Backup](#) 8.9 to add [backup to cloud](#) function. This new feature allows users to backup their crucial data to popular cloud storage Servers including Google Drive, Dropbox and OneDrive. It is useful when people lack in hard drive space for image backup file.

EaseUS backup software newly supports cloud backup

EaseUS Todo Backup is a professional backup software which is popular among users for its various flexible and advanced backup features. It is available for system backup, file backup, disk image, Outlook backup and storage device backup. Users are allowed to selectively backup their files instead of copy the entire hard drive by choosing the right backup option. This feature is designed to save time and disk space. And its schedule backup option makes automatic backup possible. It is designed for users who frequently update their data but have little time to create a backup file manually in time.

"Making efficient and considerate software is always our goal. In the past years, we've tried to help users backup their data with important information in a safe and easy way. Considering the low disk space problem, we offer users image compressing option in our backup products to help them save disk space," said Sunny Sun, the Sales Manager of EaseUS software. "Now, we are recognising that more and more people like to use cloud storage to save their data. So we have been devoting to make improvement in cloud backup for months. And fortunately, it proves to be a success! We hope that our users can like and benefit from this new feature."
