

Travel to Iran with 1stQuest Travel

1stQuest provides tours services for visiting Iran. Our aim is to create a universal travel platform within which people always can find what they want.

TEHRAN, TEHRAN, IRAN, November 23, 2015 /EINPresswire.com/ -- 1stQuest.com is a travel platform originated in Tehran, Iran. It provides tours and travel services to Iran, based on people preferences.

We want to solve two travel related problems. First a problem regarding traveling to Iran, then a universal problem of travelers, one by one.

1. Most people don't know about Iran and its tourism potentials. And those travelers who want to visit Iran can't find a solid travel website that covers their needs for researching, planning, and booking. Travel companies in Iran can't establish e-payment solutions like Paypal on their

websites because of financial sanctions. Also, Expedia, Booking.com, Airbnb and other online travel agencies don't do business in Iran due to sanctions and political considerations.

Until now we have provided some rich articles about [Iran attractions](https://1stQuest.com/blogs) and [travel to Iran](https://1stQuest.com/blogs) FAQ at our blog (<https://1stQuest.com/blogs>) and (<https://1stQuest.com/attractions>) and introduced some of our planned tours to Iran (<https://1stQuest.com/tours>)

“

We want 1stQuest to be considered as “a global leisure travel platform which enables leisure travelers to customize their trips as much as possible.”

Mehdi Sadeghpour

2. Imagine you want to have a dreamy trip to somewhere you haven't been before. You spend a lot of time surfing travel social media pages for inspirations or you ask friends for some recommendations and somehow based off your discoveries you decide to pick India as your destination, although you're not sure if that's your best match.

Now you check Travel related websites to find top places in the country or you Google “things to do in India” and after spending hours, you end up with a personalized list of places you like to see and activities you want to do in India. Now, with your list in your hand, you sit and think and spend a lot of time to create a plan for your trip that should match your interests, the money in your pocket and a number of days you can spend. And finally, you go to Expedia or Booking.com to book your flights

and hotels but you also want a local guide, so you Google “Local guide in India” and you find another website and spend some extra time to find a suitable guide.

Arranging a leisure travel still takes a lot of time and energy, it is not an easy and seamless experience, and you don't easily get a customized travel experience. To summarize it, there is no Google for travel
